PREFACE.

IN writing this treatise my object has been to give a clear exposition of the most important shape which the doctrine of immortality assumed in Egypt. This particular form of the doctrine was only one of many different ones that were held. The latter, however, were but occasional manifestations, whereas the system here treated of was the popular belief among all classes of the Egyptian people, from early to Coptic times. By far the greater part of the religious papyri and tomb texts and of the inscriptions of funerary stelæ are devoted to it; the symbolism of nearly all the amulets is connected with it; it was bound up with the practice of mummifying the dead; and it centred in the person of Osiris, the most popular of all the gods of Egypt.

Even in Pyramid times Osiris had already attained pre-eminence ; he maintained this position throughout the whole duration of Egyptian national life, and even survived its fall. From the fourth century B.C. he, together with his companion deities, entered into the religious life of the Greeks ; and homage was paid to him by imperial Rome. Throughout the length and breadth of the Roman Empire, even to the remotest provinces of the Danube and the Rhine, altars were raised to him, to his wife Isis, and to his son Harpocrates ; and wherever his worship spread, it carried with it that doctrine of immortality which was associated with his name. This Osirian doctrine influenced the systems of Greek philosophers ; it made itself felt in the teachings of the Gnostics ; we find traces of it in the writings of Christian apologists and the older fathers of the Church, and through their agency it has affected the thoughts and opinions of our own time.

The cause of this far-reaching influence lies both in the doctrine itself, which was at once the most profound and the most attractive of all the teachings of the Egyptian religion ; and also in the comfort

and consolation to be derived from the pathetically human story of its founder, Osiris. - He, the son of the gods, had sojourned upon earth and bestowed upon men the blessings of civilisation. At length he fell a prey to the devices of the Wicked One, and was slain. But the triumph of evil and of death was only apparent : the work of Osiris endured, and his son followed in his footsteps and broke the power of evil. Neither had his being ended with death, for on dying he had passed into the world to come, henceforth to reign over the dead as "The Good Being." Even as Osiris, so must each man die, no matter how noble and how godly his life ; nevertheless his deeds should be established for ever, his name should endure, and the life which is eternal awaited him beyond the tomb. To the Egyptian, nature on every hand presented images of the life of Osiris. To him that life was reflected in the struggle between good and evil, in the contest between the fertilising Nile and the encroaching desert, no less than in the daily and yearly courses of the sun. In earlier times Osiris was occasionally confounded with the Sun god ; later, the two deities

were habitually merged in one another. The death and resurrection of Osiris occurred at the end of the month Khoiak—that is to say, at the winter solstice, concurrently with the dying of the Sun of the Old Year and the rising of the Sun of the New. The new phœnix was supposed to make his appearance in March; and this bird, although usually associated with the Sun, was often representative of Osiris. And the epithets and titles of the Sun god were similarly bestowed upon Osiris.

All the Osirian doctrines were readily apprehended in spite of their deep import, and they steadily tended towards the evolution of a high form of monotheistic belief. To no close student of these doctrines can the fact seem strange that Egypt should have been the first country in which Christianity permeated the whole body of the people. The Egyptian could recognise his old beliefs in many a Christian theme, and so much did the figure of Christ remind him of Osiris and his son Horus, that to him Christ became a hero who traversed the Nile valley even as Horus had done, overcoming His enemies, the evil demons and the wicked. In Egypt the Osirian

faith and dogma were the precursors of Christianity, the foundations upon which it was able to build ; and, altogether apart from their intrinsic worth and far-reaching influence, it is this which constitutes their significance in the history of the world.

For the choice of the illustrations, as well as for the English version, I am gratefully indebted to my translator.

ALFRED WIEDEMANN.

BoNN, *March* 1895.

THE
ANCIENT EGYPTIAN DOCTRINE
OF THE
IMMORTALITY OF THE SOUL.

LITTLE as we know of the ancient Egyptian religion in its entirety, and of its motley mixture of childishly crude fetichism and deep philosophic thought, of superstition and true religious worship, of polytheism, henotheism, and pantheism, one dogma stands out clearly from this confusion, one article of belief to which the Egyptian religion owes its unique position among all other religions of antiquity—the doctrine of the immortality of the human soul. It is true that other ancient religions attained to a similar dogma, for the belief was early developed among Semites, Indo-germanians,

Turanians, and Mongolians ; but in all these cases it appears as the outcome of a higher conception of man and God and of their reciprocal relationship, and, when attained to, brought about the abandonment of grossly material forms of thought. But in Egypt we have the unique spectacle of one of the most elaborated forms of the doctrine of immortality side by side with the most elementary conception of higher beings ever formulated by any people. We do not know whether the belief in immortality which prevailed in the valley of the Nile is as old as the Egyptian religion in general, although at first sight it appears to be so. The oldest of the longer religious texts which have come down to us are found in the wall inscriptions of pyramids of kings of the Fifth and Sixth Dynasties (according to Manetho's scheme of the dynasties), and must be dated to at least 3000 B.C. In these texts the doctrine of immortality appears as a completed system with a long history of development behind it.

In that system, all the stages through which this doctrine of the Egyptian religion had successively passed are preserved ; for the Egyptians were so immoderately conservative in everything that they could not make up their minds to give up their

old ideas of deity, even after having advanced to higher and purer ones. The older ideas were all carefully retained, and we find various systems of religion which in point of time had followed each other on Egyptian soil afterwards existing side by side. There is no trace of any struggle for the victory between these systems ; each new order of thought was taken as it arose into the circle of the older ones, however heterogeneous it might be to the rest. The consequence was that in Egypt there was no religious progress in our sense of the term. With us it is essential that old and outworn forms of belief should be cast off ; with them a new doctrine could achieve no greater success than to win a place among the older conceptions of the Egyptian Pantheon.

Each single divinity, each religious belief, each amulet, has in itself a clear and intelligible significance ; and where this is apparently otherwise it is not because the point was obscure to the Egyptian mind, but because we have not yet succeeded in making it clear to ourselves. When we abandon the consideration of single points and try to imagine how the different detached notions were combined by the people into one belief, and what picture they had

really formed of their Heaven and Pantheon—then we have set ourselves an impossible task. Many divinities have precisely the same character and perform the same functions; whole circles of ideas are mutually exclusive; yet all existed together and were accepted and believed in at one and the same time.

In these circumstances any discussion of Egyptian religious ideas must begin by dealing with isolated facts; each divinity, each idea, each smallest amulet must be carefully examined by itself and treated of in the light of the texts specially referring to it. Generations of Egyptians pondered on each single point seeking to elucidate it. With anxious fear priests and laymen strove to acquire the use of all the formulæ by the help of which man hoped to appease the gods, overcome demons, and attain to bliss, and all sought to provide themselves with every amulet possessing efficacy for the world to come and import for man's eternal welfare. But great as must have been the expenditure of thought which produced and developed their various religious doctrines, the Egyptians never succeeded in welding their different beliefs and practices into one consistent whole.

In most religions the gods of life are distinct from

the gods of death, but such a distinction scarcely existed at all in Egypt. There the same beings who were supposed to determine the fate of man in this world were supposed to determine it also in the world to come ; only in the case of certain deities sometimes the one and sometimes the other side of the divine activity was brought into special prominence. The exercise of their different functions by the gods was not in accordance with any fixed underlying principle, was not any essential outcome of their characters, but rather a matter of their caprice and inclination. In course of time the Egyptian idea of these functions changed, and was variously apprehended in different places. It seems to us at first as though the relation of the gods to the life beyond had nearly everywhere been regarded as more important than their relation to this life. But this impression is owing to the fact that our material for the study of the Egyptian religion is almost exclusively derived from tombs and funerary temples, while the number of Egyptian monuments unconnected with the cult of the dead is comparatively small.

On this account it has been supposed that both in their religion and in their public life the Egyptians turned all their thoughts towards death and what lay

beyond it. But a close examination of the monuments has proved that they had as full an enjoyment of the life here as other nations of antiquity, and that they are not to be regarded as a stiff and spiritless race of men whose thoughts were pedantically turned towards the contemplation of the next world.

Had this been the case, the Egyptians would have come to hold a pessimistic view of the life here and hereafter something like that prevailing in India, and have striven to escape from the monotony and dulness of existence by seeking some means to end it. But this is the reverse of what happened in the valley of the Nile. The most ardent wish of its inhabitants was to remain on earth as long as possible, to attain to the age of one hundred and ten years, and to continue to lead after death the same life which they had been wont to lead while here. They pictured the after-life in the most material fashion ; they could imagine no fairer existence than that which they led on the banks of the Nile. How simple and at the same time how complicated were their conceptions can best be shown by some account of their ideas on the immortality of the soul and its constitution as a combination of separate parts set forth in ancient Egyptian documents.

When once a man was dead, when his heart had ceased to beat and warmth had left his body, a lifeless hull was all that remained of him upon earth. The first duty of the survivors was to preserve this from destruction, and to that end it was handed over to a guild whose duty it was to carry out its embalmment under priestly supervision. This was done according to old and strictly established rules. The internal and more corruptible parts were taken away, and the rest of the body—*i.e.*, the bony framework and its covering—was soaked in natron and asphalt, smeared with sweet-smelling unguents, and made incorruptible. The inside of the body was filled with linen bandaging and asphalt, among which were placed all kinds of amulets symbolising immortality—heart-shaped vases, snake-heads in carnelian, scarabæi, and little glazed-ware figures of divinities. By their mystic power these amulets were intended to further and assist the preservation of the corpse, for which physical provision had already been made by embalmment. In about seventy days, when the work of embalmment was completed, the body was wrapped in linen bandages, placed in a coffin, and so returned to the family.

The friends and relatives of the deceased then

carried the dead in solemn procession across the river to his last resting-place, which he had provided for himself in the hills forming the western boundary of the valley of the Nile. Mourning-women accompanied the procession with their wailing; priests burnt incense and intoned prayers, and other priests made offerings and performed mysterious ceremonies both during the procession and at the entrance to the tomb.* The mummy was then lowered into the vault, which was closed and walled up, further offerings were made, and afterwards the mourners partook of the funeral feast in the ante-chamber of the tomb. Harpers were there who sang of the dead man and of his worth, and exhorted his relations to forget their grief and again to rejoice in life, so long as it should be granted unto them

* The whole process of embalmment is briefly described in the *Rhind Papyrus*, edited by BIRCH, London, 1863, and by BRUGSCH, Leipzig, 1865. The procedure of the *taricheuts* is described in a Vienna papyrus, edited by BERGMANN, Vienna, 1887, and the conclusion of their operations in a Paris papyrus and a Bûlaq papyrus, edited by MASPERO, *Pap. du Louvre*, Paris, 1875. For the transport of the mummy, see DÜMICHEN, *Kal. Insch.*, pl. 35 *sqq.* The minutely ordered ritual for the ceremonies at the door of the tomb was published and investigated in SCHIAPARELLI'S admirable work, *Il Libro dei Funerali*, Turin, 1881—1890.

to enjoy the light of the sun ; for when life is past man knows not what shall follow it ; beyond the grave is darkness and long sleep. Gayer and gayer grew the banquet, often degenerating into an orgy ; when at length all the guests had withdrawn, the tomb was closed, and the dead was left alone. Afterwards it was only on certain feast days that the relatives made pilgrimages to the city of the dead, sometimes alone and sometimes accompanied by priests. On these occasions they again entered the ante-chamber of the tomb, and there offered prayers to the dead, or brought him offerings, either in the shape of real foods and drinks, or else under the symbolic forms of little clay models of oxen, geese, cakes of bread, and the like. Otherwise the tomb remained unvisited. How it there fared with the dead could only be learned from the doctrines and mysteries of religion ; to descend into the vault and disturb the peace of the mummy was accounted a heavy crime against both gods and men.

And yet how much an Egyptian could have wished to look behind the sealed walls of the sepulchral chamber and see what secret and mysterious things there befell the dead ! For their existence had not

terminated with death; their earthly being only had come to an end, but they themselves had entered on a new, a higher and an eternal life. The constituent parts, whose union in the man had made a human life possible, separated at the moment of his death into those which were immortal and those which were mortal. But while the latter formed a unity, and constituted the corruptible body only ( KHA), on which the above-mentioned rites of embalmment were practised, each of the former were distinct even when in combination. These "living, indestructible" parts of a man, which together almost correspond to our idea of the soul, had found their common home in his living body; but on leaving it at his death each set out alone to find its own way to the gods. If all succeeded in doing so, and it was further proved that the deceased had been good and upright, they again became one with him, and so entered into the company of the blessed, or even of the gods.

The most important of all these component parts*

* On these component parts cf. WIEDEMANN in the *Proceedings of the Orientalist Congress at St. Etienne*, II. (1878), p. 159 *et seq.* Many parallel texts to the additional chapter of *The Book of the Dead*, there referred to, may be found in VON BERGMANN'S *Sarkophag des Panchemisis*, I., p. 22; II., p. 74 *et seq.*

was the so-called $\left[\begin{array}{c} \text{L} \\ \text{J} \end{array} \right]$, KA, the divine counterpart of the deceased, holding the same relation to him as a word to the conception which it expresses, or a statue to the living man. It was his individuality as embodied in the man's name; the picture of him which was, or might have been, called up in the minds of those who knew him at the mention of that name.* Among other races similar thoughts have given rise to higher ideas, and led to a philosophic explanation of the distinction between personalities and persons, such as that contained in the Platonic Ideas. But the Egyptian was incapable of abstract thought, and was reduced to forming a purely concrete conception of this individuality, which is strangely impressive by reason of its thorough sensuousness. He endowed it with a material form completely corresponding to that of the man, exactly resembling him, his second self, his Double, his *Doppelgänger*.†

Many scenes, dating from the eighteenth century

* On this account KA was sometimes used as interchangeable with REN ()—name.

† There is no modern word which exactly expresses the Egyptian idea of the KA; Maspero's translation of "DOUBLE, *Doppelgänger*" is the best hitherto proposed; Meyer's translation of "Ghost" (*Gesch. Äg.*, p. 83) is altogether misleading.

B.C. and onwards, represent different kings appearing

Fig. 1.—Hatshepsû, accompanied by her KA, making perfume-offerings. (From the temple of Dêr el Bahri.) *

* The illustration is taken from LEPSIUS, *Denkmäler*, III. 21. Here the solar cartouche, or throne-name, of Thothmes II., and his

before divinities, while behind the king stands his KA, as a little man with the king's features (fig. 1), or as a staff with two hands (fig. 2),* and surmounted by certain symbols of royalty, or by the king's head. In these scenes the Personality accompanies the Person, following him as a shadow follows a man.

But even as early as the time of Amenophis III., about 1500 B.C., the Egyptians had carried the idea still further, and had completely dis severed the Per-

Horus- or KA-name, are palimpsests effacing the names of Queen Hatshepsû Rāmaka, the builder of the temple. The figures in this scene originally represented the Queen and her KA; but as she is always portrayed in male attire throughout the temple, it was only necessary to change her names in order to appropriate her figure as that of a king. The first satisfactory explanation of the Horus- or KA-name was given by PETRIE in *A Season in Egypt*, pp. 21, 22; cf. MASPERO, *Études Égyptologiques*, II., p. 273 *et seq.* He shows that the rectangular parallelogram in which the Horus-name is written is the exact equivalent of the square panel over the false door in the tomb, by which the KA was supposed to pass from the sepulchral vault into the upper chamber, or tomb-chapel, where offerings were provided for it. A private person had but one name, which was also the name of his KA. But, on ascending the throne, the king took four new names in addition to the one which he had hitherto borne, and among them a name for his KA.

* We have a crude representation of this KA sign, dating from the reign of Amenemhat I., of the Twelfth Dynasty; see PETRIE, *Tanis I.* (Second Memoir of the Egypt Exploration Fund), pl. I., No. 3.

sonality from the Person, the king being frequently represented as appearing before his own Personality,

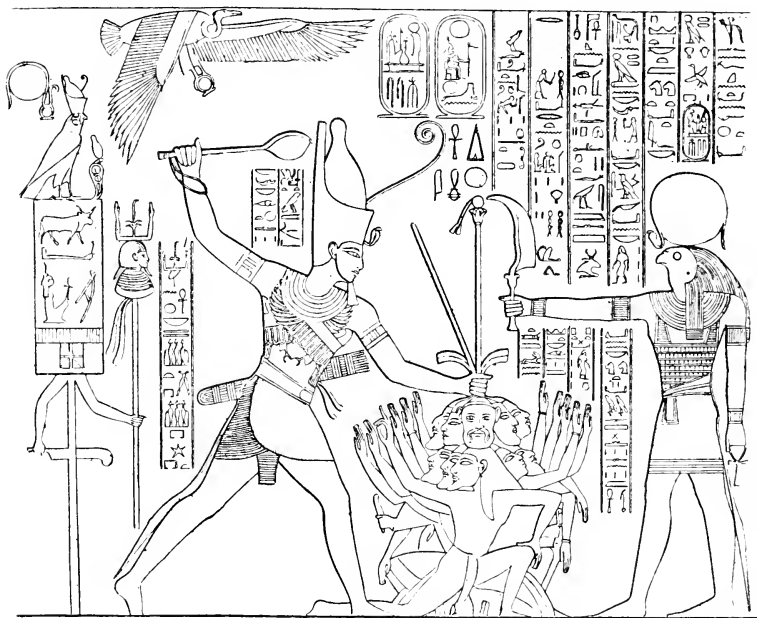

Fig. 2.—The KA of Rameses II., represented by the two-handed staff, standing behind the king while he slays his enemies before Rā Harmakhis. (From *Abū Simbel*.) *

which bears the insignia of divinity, the staff of command, and the symbol of life, the ☩ *ānkh* (fig. 3).

* LEPSIUS, *Denkmäler*, III. 186. The hands of the KA-staff have doubtless a common origin with those of the KA-sign— ☩ .

To it the king presents offerings of every kind and prefers his petition for gifts of the gods in exchange

Fig. 3.—Amenophis III. making offerings to his Ka. (From his temple at Soleb.) *

His Personality replies: "I give unto thee all Life, all Stability, all Power, all Health, and all Joy (enlargement of heart); I subdue for thee the

* LEPSIUS, *Denkmäler*, III. 87.

peoples of Nubia (Khent), so that thou mayest cut off their heads." In bas-reliefs of the same period which represent the birth of Amenophis III.,* his KA is born at the same time as the king, and both are presented to Amen Rā, as two boys exactly alike (fig. 4), and blessed by him. About this time the kings began to build temples to their own Personalities, and appointed priests to them; and from time to time the sovereign would visit his temple to implore from himself his own protection, and still greater gifts. So long as the king walked the earth, so long his "living KA, lord of Upper and Lower Egypt, tarried in his dwelling, in the Abode of Splendour ($\square_{\times} \overset{\circ}{\square}$ *Pa Dûat*)";† for his KA was himself, independent of him, superior to him, and yet his counterpart and bound up with him.

The disjunction of the Personality from the Person was not, however, rigorously and systematically insisted upon; the two were indeed separate, but were so far one as to come into being only through and with each other. A man lived no longer than

* In the course of his excavations at Dêr el Bahri, for the Egypt Exploration Fund, M. Naville discovered the originals of these scenes in a series of bas-reliefs representing the birth of Queen Hatshepsû which were plagiarised by Amenophis III.

† LEPSIUS, *Denkmäler*, III. 21, 129.

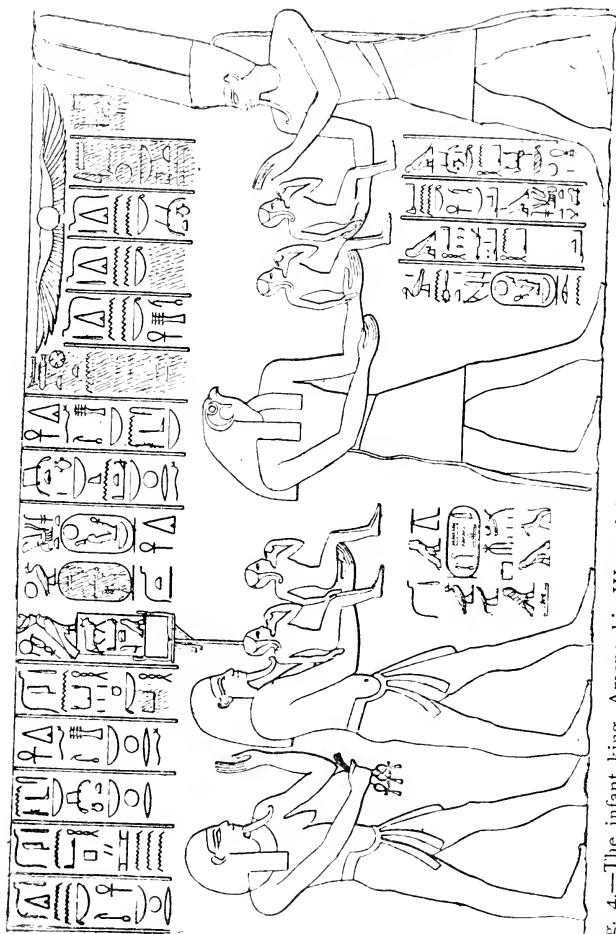

Fig. 4.—The infant king, Amenophis III. and his KA, presented to Amen Rā, the god of Thebes, by two Nile gods, and by Horus. (From the temple of Amenophis III., at Luxor.) *

* LERSIUS, *Denkmäler*, III, pl. 75.

his KA remained with him, and it never left him until the moment of his death. But there was this difference in their reciprocal relations: the KA could live without the body, but the body could not live without the KA. Yet this does not imply that the KA was a higher, a spiritual being; it was material in just the same way as the body itself, needing food and drink for its well-being, and suffering hunger and thirst if these were denied it. In this respect its lot was the common lot of Egyptian gods; they also required bodily sustenance, and were sorely put to it if offerings failed them and their food and drink were unsupplied.

After a man's death his KA became his Personality proper; prayers and offerings were made to the gods that they might grant bread and wine, meat and milk, and all good things needful for the sustenance of a god to the KA of the deceased.*

* Such prayers were also inscribed on funerary stelæ in order that passers-by might repeat them for the benefit of the dead. These inscriptions vary but little. The prayer on the funerary tablet of Khemnekht (now in the Agram Museum) dates from the Thirteenth Dynasty, and runs as follows: "O every scribe, every Kherheb (lector, priestly reciter), all ye who pass by this stele, who love and honour your gods, and would have your offices to flourish (shine) for your children, say ye: 'Let royal offerings be brought unto Osiris for the Ka of the priest

Offerings were also made to the KA itself, and it was believed that from time to time it visited the tomb in order to accept the food there provided for it. On such occasions it became incorporate in the mummy, which began to live and grow ( *rt'd*), or renew itself as do plants and trees ( *renp*), and became, as the texts occasionally express it, "the living KA in its coffin." The rich founded endowments whose revenues were to be expended to all time in providing their KAS with food offerings, and bequeathed certain sums for the maintenance of priests to attend to this; large staffs of officials were kept up to provide the necessaries of life for the Personalities of the dead.*

Khemnekht.'" For an account of the development of the formulæ on funerary stelæ, see WIEDEMANN, *Observations sur quelques stèles funéraires égyptiennes, Le Muséon X.*, 42, 199 *et seq.*

* The particulars above summarised may be verified from contracts which a prince (*crpā-hā*) of Siût concluded with the priests of Anubis under the Tenth or Eleventh Dynasty (discussed by MASPERO, *Transactions of the Society of Biblical Archaeology*, VII., p. 6 *et seq.*, *Études de Mythologie*, I., p. 62 *et seq.*, and ERMAN, *Æg. Zeitschr.*, 1882, p. 159 ff., the best publication of these inscriptions being that by GRIFFITH, *Inscriptions of Siût and Dér Rifeh*, London, 1889. Similar contracts were made even in the times of the pyramid-building kings: cf. *e.g.*, LEPSIUS, *Denkmäler*, II. 3-7; DE ROUGÉ, *Inscriptions hiéroglyphiques*, pl. I.; MARIETTE, *Les Mastabahs*, p. 316 *et seq.*)

The KA was represented by statues of the dead man which were placed within his tomb, and sometimes in temples also by gracious permission of the sovereign.* Wherever one of these statues stood, there might the KA sojourn and take part in Feasts of Offerings and the pleasures of earthly life; there even seems to have been a belief that it might be imprisoned in a statue by means of certain magic formulæ. Royal statues in the temples were destined to the use of the royal KAS, the many statues of the same king in one temple being apparently all intended for his own KA service. †

The Egyptians, holding the belief that the statue of a human being represented and embodied a human KA, concluded that the statues of the gods represented and embodied divine KAS, and were indeed neither more nor less than the KAS of the gods. Thus the idea of divinity became entirely anthropomorphic, and, just as the king built his temple not to himself but to his Personality, so also sanctuaries were sometimes dedicated not to a god himself but to

* As in the case of statues found in the temple of Ptah at Memphis (MARIETTE, *Mon. div.*, pl. 27 b), and in that of Amon at Karnak (MARIETTE, *Karnak*, pl. 8 f; cf. LEPSIUS, *Auswahl*, pl. 11).

† This striking theory was first broached by MASPERO, *Rec. de Trav.*, I., p. 154; *Études de Mythologie*, I. p. 80.

his Personality. For example, the chief temple of Memphis was not for the service of the god Ptah,—the maker of the world, whom the Greeks compared to Hephæstos,—but rather for that of his KA. Ptah was not alone among the gods in this respect. The pyramid texts show that even in the times of the Fifth and Sixth Dynasties Thot, Set, Horus, and other gods were recognised as having KAS; that is to say, each was supposed to be possessed of his own Personality in addition to himself.* It was believed that the divine KA, this image which had the greater likeness to man, stood nearer to man than the god himself, and hence in the case of votive stelæ dedicated to the incarnation of Ptah in the sacred Apis-bull of Memphis, prayer for the divine favour and blessings is not as a rule addressed to the Apis, but to its KA. It is a very remarkable fact that in several inscriptions † the god

* We find occasional mention of the KA of the East and the KA of the West (WILKINSON, *Manners and Customs*, 2nd ed., III., pp. 200, 201), which are to be considered as being the KAS of the deities of the East and of the West, and not as KAS of the abstract conceptions of East and West.

† LEPSIUS, *Denkmäler*, III. 194, l. 13; DÜMICHEN, *Tempel-inschriften*, I., pl. 29; VON BERGMANN, *Hierogl. Insch.*, pl. 33 pl. 61, col. 2; RENOUF, *Transactions of the Society of Biblical*

Rā is credited with no less than seven BAS and fourteen KAS, corresponding to the various qualities or attributes pertaining to his own being, and which he could communicate to the person of the king; such as: wealth, stability, majesty, glory, might, victory, creative power, etc.*

Thus the apprehension of the KA, of a man's Personality, as his *Doppelgänger*, or *Double*, found even in some of the oldest texts, acquired a far-reaching significance which extended not only to the doctrine of human immortality but also to the conception of the relations of gods to men.

As we have already stated, each man had a KA so long as he was alive, but at his death it left him and led an independent existence. Only after long wanderings did he meet it again in the world to come, and we still possess the prayer with which he was to greet it, beginning with the words, "Hail to thee who wast my KA during life! I come unto thee," etc.†

Archæology, VI., pp. 504 *et seq.*; BRUGSCH, *Dictionary, Suppl.*, pp. 997 *et seq.*, 1230.

* Cf. 1 Chron. xxix. 11, 12; Isa. xi. 2.

† This prayer is contained in that part of *The Book of the Dead*, chap. cv., entitled *Chapter whereby the KA of a person is satisfied in the Nether world*: "Hail to thee who wast my KA during life! Lo! I come unto thee, I arise resplendent, I labour, I am strong, I am hale (*ʿar*, I pass on), I bring grains of incense,

The second immortal part of man was his heart (  *àb*).^{*} The heart was removed from the body by the embalmers, and the texts give no definite explanation as to what became of it. During certain I am purified thereby, I purify thereby that which goeth forth from thee. This conjuration of evil which I say; this warding off of evil which I perform; (this conjuration) is not made against me (?)" The conjuration runs as follows: "I am that amulet of green felspar, the necklace of the god Rā, which is given (*var.*, which I gave) unto them who are upon the horizon. They flourish, I flourish, my KA flourishes even as they, my duration of life flourishes even as they, my KA has abundance of food even as they. The scale of the balance rises, Truth rises high to the nose of the god Rā in that day on which my KA is where I am (?) My head and my arm are made (?) to where I am (?) I am he whose eye seeth, whose ears hear; I am not a beast of sacrifice. The sacrificial formulæ proceed where I am, for the upper ones"—otherwise said, "for the upper ones of heaven." The funerary papyrus of Sûtîmes (NAVILLE, *Todtenbuch*, I., pl. 117) contains the following addition at the end of this chapter: "I enter (?) unto thee (to the KA?). I am pure, the Osiris is justified against his enemies." The accompanying vignette for this chapter shows the deceased as worshipping or sacrificing before the KA-sign on a standard. Occasionally we find the KA sign represented as enclosing pictures of offerings, a form explained by the common double meaning of the word KA, which signifies both "*Double*" and *food*.

* In the religious texts the heart is called both   *àb*, and   *hâtî*. Sometimes, as in *The Book of the Dead*, chap. xxvi. *et seq.*, the two were differentiated; but, generally speaking, the two terms appear to have been synonymous.

Fig. 5.—SET OF "CANOPIC" VASES.*

Ämsct. Düamütef. Häpi. Qebhsenüf.

* The illustration represents the set of Canopic vases dating from the Thirtieth Dynasty, made for the priest Tet-bast-auf-änkh, and found by Prof. Petrie at Hawara (*Hawara, Dakhla, and Assiut*, p. 9). They are now in the Ashmolean Museum, Oxford.

The lids of such vases represent the four genii of the dead:

periods of Egyptian history, but still comparatively rarely, it was enclosed, as were the rest of the viscera, in special alabaster, limestone, or wooden vases, of which four were placed with the mummy in its grave. These vases are generally but most erroneously called "Canopic" vases. They usually date from the times of the New Empire, but we have some few dating from the Ancient Empire. In other cases the viscera were replaced within the body after its embalmment, and with them waxen images of the four genii of the dead as their guardian divinities. But for the most part documents do not afford us any information as to what was done with the material heart. Perhaps the priests took measures for its disappearance in order to furnish some tangible foundation for their doctrine concerning the heart. Certain statements of Greek writers seem to imply some such proceeding. According to these authorities the viscera, which must have included the heart, were cast into the Nile, because they were designated as the source of all human error. Porphyry gives us even the form of the prayer which was repeated when the chest containing the intestines was presented before the Sun; and if the text of this prayer has not hitherto been confirmed from original

documents it is yet so thoroughly Egyptian in character that its authenticity cannot be doubted.*

* PLUTARCH, *Septem sap. conviv.*, p. 159 B: "We then, said I" (Diales), "render these tributes to the belly (τῆ γαστρί). But if Solon or any one else has any allegation to make we will listen." "By all means," said Solon, "lest we should appear more senseless than the Egyptians, who cutting up the dead body showed [the entrails] to the sun, then cast them into the river, but of the rest of the body, as now become pure, they took care. For in reality this [the belly] is the pollution of our flesh, and the Hell, as in Hades,—full of dire streams, and of wind and fire confused together, and of dead things."

PLUTARCH, *De esu carniū orat.*, ii., p. 996, 38: "As the Egyptians, taking out from the dead the belly (τὴν κοιλίαν) and cutting it up before the sun, cast it away, as the cause of all the sins which the man has committed; in like manner that we ourselves, cutting out gluttony and bloodthirstiness, should purify the rest of our life."

PORPHYRY, *De abst.*, iv., 10: "When they embalm those of the noble that have died, together with their other treatment of the dead body, they take out the belly (τὴν κοιλίαν), and put it into a coffer, and holding the coffer to the sun they protest, one of the embalmers making a speech on behalf of the dead. This speech, which Euphantus translated from his native language, is as follows: "O Lord, the Sun, and all ye gods who give life to men, receive me and make me a companion to the eternal gods. For the gods, whom my parents made known to me, as long time as I have had my life in this world I have continued to reverence, and those who gave birth to my body I have ever honoured. And for the rest of men, I have neither slain any, nor defrauded any of anything entrusted to me, nor committed any other wicked act, but if I haply in my life have sinned at

But the immortal heart of a man, which stood in a similar relationship to his material heart as his KA to the whole body, left him at death and journeyed on alone through the regions of the other world till it reached the "Abode of Hearts." Its first meeting with the deceased to whom it had belonged was in the Hall of Judgment, where it stood forth as his accuser; for in it all his good and evil thoughts had found expression during his lifetime. They had not originated there, for the heart was essentially divine and pure, but it had of necessity harboured and known them,* and therefore it was called upon to testify concerning the man's former thoughts and deeds before Osiris, judge of the dead.

In the meantime the mummy was without heart, and had become lifeless and dead; for to pierce the heart of anything was equivalent to utterly destroying

all, by either eating or drinking what was unlawful, not on my own account did I sin, but on account of these (showing the coffer in which the belly [*ἡ γαστήρ*] lay)." And having said these things he throws it into the river; but the rest of the body, as pure, he embalms. Thus they thought that they needed to excuse themselves to the Deity on account of what they had eaten and drunk, and therefore to reproach the belly."

* It was in this sense that the Egyptians regarded the heart as the seat of the feelings, and spoke of the heart as rejoicing, as mourning, as weeping.

it. The OSIRIS, too (to which we shall presently return), would have shared the fate of the mummy had the device not been conceived of providing the latter with an artificial heart in place of its own original one, which had returned to the gods. The provisional heart was represented by an artificial

Fig. 6.—A heart scarab.*

scarabæus, generally made of hard greenish stone in the image of the beetle, which was a symbol of genesis and resurrection (fig. 6). Underneath it was made flat, and inscribed with magic formulæ,† that it might be the substitute for the dead man's heart,

* The illustration is taken from photographs of a scarab in the Edwards collection at University College, London.

† For the translation of chap. xxx b. of *The Book of the Dead*, which formed the usual inscriptions on heart scarabs, see p. 53.

and also ensure his resurrection by virtue of its form. But when his own heart was restored to him the scarabæus lost its significance. Like all the rest of the amulets which the Egyptians gave to their dead, its efficacy only availed for the space of time intervening between death and the reunion of those

Fig. 7.—The Ba as a bird.

elements which death had separated. When once the resurrection had taken place there was no further need of amulets, nor any hurt through lack of them.

Another immortal part of man was the , , , BA. This conception most nearly corresponds to our "soul," for it was a being which, on the death of the man in whom it had dwelt, left him in order to fly to the gods, to whom it was closely akin,

and with whom it abode when not united to the man. But, nevertheless, the BA was neither immaterial nor able to dispense with food and drink.* It bore the form of a human-headed bird (fig. 7), sometimes with hands (figs. 10, 14); or of a ram-headed scarabæus (fig. 8). From the fifteenth to the eleventh century

Fig. 8.—Ram-headed scarabæus. †

B.C. it was preferably represented under the second form which is really nothing more than its hieroglyphic symbol. The phonetic value of the ram, , is *ba*, and of the scarabæus, , *kheper*, which latter means *to be, to become*; and the composite figure of the ram-headed scarabæus signifies, therefore, something like “he who has become a soul.”

It is otherwise with the first image, which really represents the soul as it was imagined by the Egyptians. We have sculptured figures and drawings (fig. 9)

* The possession of the formula in chap. cxlviii. of *The Book of the Dead*, from line 8, ensured abundance (of food) to the BA of the dead.

† Illustrations 7 and 8 are taken from photographs of objects in the Edwards Museum at University College.

showing the little soul perched by the sarcophagus, touching the mummy, and bidding it farewell before rising to the gods.* In other scenes the soul is

“*The Book of the Dead.*”)

depicted as it comes flying from heaven with the sign of life in its hand, and approaching the grave

* See *The Book of the Dead*, NAVILLE'S edition, pls. 4, 97, 101, 104; LEPSIUS' edition, pls. 33, etc., etc.

to visit the mummy; or as flying down into the vault with the offerings which it had found at the door of the tomb, bringing bread in one hand and a jar of water in the other, as food and drink for the body which once invested it (fig. 10).

This conception of the soul as a kind of bird is noteworthy when compared with the ideas which other nations have formed of it. The Greeks sometimes represented the *εἶδωλον*, or soul, as a small winged human figure (fig. 11); in Roman times it was imagined as a butterfly (fig. 12); and in mediæval reliefs and

pictures we see it leaving the mouth of the dead man as a child (fig. 13), or a little naked man.*

of the Triumph of Death, in the Campo Santo of Pisa.

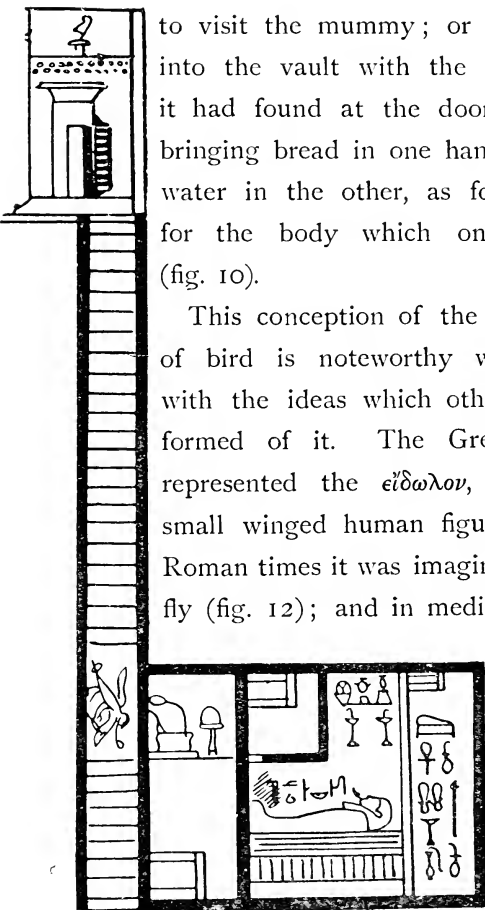

Fig. 11.—The placing of the dead in the tomb by Thanatos (Death) and Hypnos (Sleep). The small winged figure represents the dead man's soul. (From a *lekythos* published by M. C. PORTIER in his *Étude sur les Lecythes Blancs Attiques*. The $\epsilon\iota\theta\omega\lambda\omicron\nu\sigma$ was usually painted black.)

Fig. 12.—Scene from a sculptured sarcophagus of the third century A.D., in the Capitoline Museum, Rome. To the left, below the chariot of Selene and the draped figure of Night, lies the dead body of the man, whose soul hovers above him as a butterfly beside the inverted torch of the pensive winged boy representing either Sleep or Death. Fate sits with open scroll at the dead man's head, and above her his soul is again represented as a Psyche, carried away by Hermes. (See BORTARI, *Musee Capitoline*, vol. iv., pl. xxv. Cf. also many representations of Amor and Psyche in ancient art, showing Psyche—the soul—sometimes as a winged figure and sometimes as a butterfly.)

Fig. 13.—The soul of a man leaving him at his death in the form of a naked child, and received by an angel. (*From the porch of the cathedral church of St. Trophimus, at Arles.*)

The latter form recalls that of the Egyptian KA, although the idea which it embodies reminds one rather of the BA.

The , SĀHÛ, also was considered as immortal. This is invariably depicted as a swathed mummy, and represented the form which the man wore upon earth. Originally it was related to the KA, but whereas the latter was a complete Personality, the SĀHÛ was nothing but a hull,—a form without contents. Yet this also was of the gods and imperishable, returning to its heavenly home when death had set it free. Since the body, or KHĀ,* had also the same form, it naturally came about that when the mummy was mentioned in religious texts as reanimated by the KA it was frequently confounded with the SĀHÛ. In this sense it is said that “the SĀHÛ lives in the Sarcophagus (or in the underworld), it grows (*rûd*), it renews itself (*renp*.” † But in more precise texts the two things are kept distinct, as, e.g., “the BA (soul) sees its KHĀ, it rests upon its SĀHÛ. ‡ At such times the BA had power

* See p. 10.

‡ *The Book of the Dead*, lxxxix. 6.

over the SĀHÛ, and, as is said on the Sarcophagus of Panehemisis, "the SĀHÛ lives at the command of the BA."*.

In close connection with the SĀHÛ was the , KHAÏB, the shadow, represented as a fan, or sunshade (fig. 14), in scenes professing to portray the next world. †

As all earthly forms must needs have their shadows, such was also the case with things in the world to come; there, too, the sun shone and all the optical phenomena of earth were repeated. But, not content to accept this as a simple fact, the Egyptians ascribed separate existences both to the shadows of the dead and to those of gods and genii. According to Egyptian belief a shadow might live on independently, apart from its owner, and this was exactly what it was supposed to do at the moment when death had taken place; then the KHAÏB went forth alone to appear in the realm of the gods. This Ancient Egyptian idea of the independent existence of a man's shadow recalls to our minds

* VON BERGMANN, *Sarkophag des Panehemisis*, I., p. 37, where the translation is not quite accurately given.

† In *Transactions of the Society of Biblical Archæology*, VIII., p. 386 *et seq.*, BIRCH has collected passages bearing on this point.

Chamisso's story of Peter Schlemihl, published in 1823.*

The KA, the ĀB, the BA, the SĀHÛ, and the KHAÏB constituted the chief elements of that which was immortal in man, but others were also occasionally included, especially one which was called the KHÛ,

Fig. 14.—BA and KHAÏB. (From "The Book of the Dead.")

, *i.e.* the Luminous.† To these, however, there is less frequent reference; they were of import-

* On primitive beliefs as to a man's shadow being a vital part of himself, see FRAZER, *The Golden Bough*, Vol. I., pp. 141-44.

In *The Book of the Dead*, chap. lxxxix., 3, the KHÛ is mentioned in connection with the BA; in chap. cxlix., 40, with the KHAÏB; and in chap. xcii., 5, with both.

ance in local cults only, and were either included among the parts already mentioned or were so vaguely defined that they may be safely left out of account in treating of the soul as conceived by the Egyptians without danger of our conception being falsified by the omission.

When the immortal was thus resolved into its component parts at death, what then became of the human individuality which had resulted from their combined action, and how could its different parts find each other again in the next world, in order to form the new man of the resurrection? The Egyptians had evolved a very simple solution of this problem, although one which, according to our mode of thought, stands in direct contradiction to their doctrine of the soul. It was assumed that in addition to his immortal elements the man as a person of a particular appearance and character was also endowed with a kind of deathlessness, which seems to have held good only for a time, and not for ever. To this conception of a dead man, in whom soul and life were lacking but who in the interim still possessed existence, feeling, and thought, the Egyptians gave the name of OSIRIS.

Osiris was the first divine King of Egypt who reigned in true human likeness; he civilised the Egyptians, instructed them in agriculture, gave them laws, and taught them true religion. After a long and blessed reign he fell a prey to the machinations of his brother Set (Typhon), and having been slain was constrained to descend into the underworld, where he evermore lived and reigned as judge and king of the dead. His fate of death was the fate of all men. Every one, when his earthly pilgrimage was ended, must descend into the underworld by the gates of death; but each man hoped to rise again, even as Osiris had risen, to lead henceforth the life of the blessed. In this hope men called their dead OSIRIS, just as Germans speak of their dead as "blessed,"—hoping that blessedness may indeed be their lot. Death had not changed Osiris; as he had been king on earth, so he was king in the world beyond death. In the same way man, too, remained that which he had been here; death merely made a break in his life, without altering any of his conditions of existence.

The relation subsisting between a man's OSIRIS and his mummy was not clearly apprehended, even by the Egyptians themselves. Identical they were

not—that fact is obviously implied by the texts, which never once substitute the mummy for the OSIRIS; men knew also from experience that no mummy had ever left its place of embalment, or the tomb, to journey on into the next world. Yet

Fig. 15.—Hypocephalus, from a drawing by Dr. W. H. Rylands.

mummy and OSIRIS were nevertheless not entirely different and distinct; both had the same appearance and the same character. Moreover, the texts describe the OSIRIS as resembling the mummy in appearance while really differing from it, and the embalmers equipped the mummy as though it were called upon

to journey forth as the OSIRIS. The inherent contradiction in all this arose principally from the fact that the Egyptian hoped and believed that shortly after death he would arise again, complete in flesh and blood as he had lived upon earth; whereas experience contradicted his creed, for it showed him that the mummy never did and never could leave the earth. He extricated himself from the dilemma by providing the mummy with a *Doppelgänger*: its own perfect counterpart, yet not itself. When once we have familiarised ourselves with this singular idea we find in it a simple key to all the riddles of the OSIRIS.

The mummy was provided with an artificial heart in the shape of a scarabæus,* because the OSIRIS could not live without one, and also with various amulets, by virtue of every one of which demons of the next world could be overcome. A stuccoed disc of papyrus, linen, or bronze, which, by the figures and formulæ inscribed upon it, had mystic power to preserve the needful warmth of life to the Osiris (fig. 15), was placed under the head of the mummy.† The soles

* See p. 30.

† A certain part in the religious life of our own time has been played by a similar "Hypocephalus," viz., the Mormon Scriptures

of the feet which had trodden the mire of earth were removed in order that the OSIRIS might tread the Hall of Judgment with pure feet; and the gods were prayed to grant milk to the OSIRIS that he might bathe his feet in it and so assuage the pain which the removal of the soles must needs have caused him. And, finally, the soles which had been excised were placed within the mummy in order that the OSIRIS might find them to hand for the completion of his Personality.* That nothing might be wanting to this Personality, the gods were besought that the mummy should not suffer earthly corruption, and it was held to be of supreme importance that flesh and bones, muscles and limbs should all remain in place. With the mummy were also placed *The Book of the Dead*, as well as other religious and mystic texts needed by the OSIRIS for his guidance through the regions beyond the grave, and from which he might learn the prayers which had to be spoken in due order and place according to strict prescriptions. In short,

(cf. JOSEPH SMITH, *A Pearl of Great Price*, 1851, p. 7). For particulars of the Hypocephalus of the illustration see *Proceedings of the Society of Biblical Archaeology*, Vol. VI., p. 52, and plate.

* See EBERS, *Æg. Zeitschr.*, 1867, p. 108; 1871, p. 48; WIEDEMANN, *Proceedings of the Orientalist Congress at St. Etienne*, II., p. 155.

the mummy was treated precisely as though it were an OSIRIS. But the difference was great: the mummy remained within the sarcophagus in the sepulchral chamber, while the OSIRIS proceeded on his way.

The journey of the OSIRIS, treated at wearisome length, forms the favourite subject of Egyptian texts, and to this is devoted the largest and best known work in the religious literature of the nation: the compilation called by us *The Book of the Dead*. This book contains no systematic account of the journey, such as the analogy of similar literatures might lead us to expect, but exhibits it in a series of disconnected stages by giving the prayers which the OSIRIS must repeat when passing through different parts of the underworld, or on encountering certain genii there. A chapter is devoted to each prayer, but the chapters do not follow each other in the order in which the prayers were to be used. The Egyptians never attained to any clear idea of the Osirian underworld; the same confusion and obscurity reigned over it as over their whole conception of the unseen world and of deity. They pondered deeply over a series of separate problems without being able to unite the results into one consistent whole, which should

command acceptance, or to form any definite and permanent topography of the regions beyond the tomb. Hence there is no fixed sequence for the chapters of *The Book of the Dead*; the order varies materially in the different manuscripts to which we are indebted for our knowledge of the work. The number of chapters in the different copies also varies; while in some it is small, in others, as in the Ptolemaic copy for a certain Aûfâkh, published by Lepsius, it reaches to one hundred and sixty-five. Since there was no fixed rule as to order or number, priest or scribe might make a selection of such chapters as he or the family of the deceased held to be the most essential, and each was at liberty to form for himself a more or less modified conception of the characteristics of the underworld.

We cannot here follow the OSIRIS through all the details of his journey, but must be content to know that according to the account in *The Book of the Dead* he issued victorious from all his trials, overcame all enemies whom he encountered, and was ushered at length into the Hall of the Double Truth, and received by the goddess of Truth. Here also he found the chief gods of the Osirian cycle gathered together, and the forty-two assessors of Divine Justice

near the canopy under which the god Osiris was enthroned. Then the deceased spoke, and proceeded to recite the "Negative Confession"—a denial of sins of commission—declaring that he had not been guilty of certain definite sins, and denying one or another particular form of guilt to each of the assessors. He had not done evil, had not robbed, nor murdered, nor lied, not caused any to weep, not injured the property of the gods, and so on.*

* The "Negative Confession" forms chap. cxxv. of *The Book of the Dead*, and varies slightly in different copies. The following is RENOUF'S translation of the chapter as it appears in a Nineteenth Dynasty papyrus (see *The Papyrus of Ani*, London, 1890):—"I am not a doer of what is wrong. I am not a plunderer. I am not a robber. I am not a slayer of men. I do not stint the quantity of corn. I am not a niggard. I do not seize the property of the gods. I am not a teller of lies. I am not a monopoliser of food. I am no extortioner. I am not unchaste. I am not the cause of others' tears. I am not a dissembler. I am not a doer of violence. I am not of domineering character. I do not pillage cultivated land. I am not an eavesdropper. I am not a chatterer. I do not dismiss a case through self-interest. I am not unchaste with women or men. I am not obscene. I am not an exciter of alarms. I am not hot in speech. I do not turn a deaf ear to the words of righteousness. I am not foul-mouthed. I am not a striker. I am not a quarreller. I do not revoke my purpose. I do not multiply clamour in reply to words. I am not evil-minded or a doer of evil. I am not a reviler of the

The judges heard all in silence, giving no sign either of approval or disapproval; but when the confession was ended the heart of the deceased was brought forward and laid in the scales against the

Fig. 16.—The weighing of the dead man's heart against the feather symbolic of Maāt, the goddess of Truth. (From "*The Book of the Dead.*")

image or symbol of Truth. The weighing was superintended by the gods Anubis and Horus,

king. I put no obstruction upon the water. I am not a bawler. I am not a reviler of the God. I am not fraudulent. I am not sparing in offerings to the gods. I do not deprive the dead of the funeral cakes. I do not take away the cakes of the child, or profane the god of my locality. I do not kill sacred animals."

while Thot, the scribe of the gods, stood by ready to record the result (fig. 16).*

This was the time for the deceased anxiously to call upon his heart in the prescribed formula from *The Book of the Dead*,† not to bear witness

* On the Egyptian Goddess of Truth, see WIEDEMANN, *La Déesse Maât*, in the *Annales du Musée Guimet*, x., pp. 561 *et seq.* With regard to the meaning of the Egyptian name and word *Maât*, which is generally translated "truth, or justice," Renouf has said: "The Egyptians recognised a divinity in those cases only where they perceived the presence of a fixed Law, either of permanence or change. The earth abides for ever, and so do the heavens. Day and night, months, seasons, and years succeed each other with unfailing regularity; the stars are not less constant in their course, some of them rising and setting at fixed intervals, and others eternally circling round the pole in an order which never is disturbed. This *regularity*, which is the constitutive character of the Egyptian divinity, was called  *Maât*. The gods were said to be *nebû maât*, 'possessors of *maât*,' or *ânchiû em maât*, 'subsisting by or through *maât*.' *Maât* is in fact the Law and Order by which the universe exists. Truth and justice are but forms of *Maât* as applied to human action."—*Papyrus of Ani*, Introduction, p. 2.

† This prayer is contained in chap. xxx. of *The Book of the Dead*:—

"Chapter whereby the heart of a person is not kept back from him in the Netherworld.

Heart mine which is that of my mother,

Whole heart mine which is that of my birth,

Let there be no estoppel against me through evidence, let no

against him, for "the heart of a man is his own god,"* and must now determine his everlasting fate. If his heart were content with him, and the scales turned in his favour, then the god Thot commanded that his heart should be restored to him to be set again in its place. This was done, and forthwith the immortal elements which death had separated began to reunite. His KA, and all the remaining parts of himself, were now restored to the justified OSIRIS, who was thus built up into the complete man who had once walked the earth, and who now entered upon a new life, the everlasting life of the righteous and the blessed. He

hindrance be made to me by the divine Circle; fall thou not against me in presence of him who is at the Balance.

Thou art my genius (KA), who art by me (in my KHA-T), the Artist who givest soundness to my limbs.

Come forth to the bliss towards which we are bound;

Let not those Ministrants who deal with a man according to the course of his life give a bad odour to my name.

Pleasant for us, pleasant for the listener, is the joy of the Weighing of the Words.

Let not lies be uttered in presence of the great god, Lord of the Amenti.

Lo! how great art thou (as the triumphant one)."

—Renouf's translation.

* As stated on the mummy case of Panehemisis, ed. VON BERGMANN, I., p. 29.

was joyfully admitted by the gods into their circle, and was henceforth as one of them.

The Book of the Dead, and cognate religious texts, always assume that judgment goes in favour of the deceased, that his heart approves him, and that he becomes one of the blessed. Nowhere are we clearly informed as to the fate of the condemned who could not stand before the god Osiris. We are told that the enemies of the gods perish, that they are destroyed or overthrown; but such vague expressions afford no certainty as to how far the Egyptians in general believed in the existence of a hell as a place of punishment or purification for the wicked;* or whether, as seems more probable, they held some general belief that when judgment was pronounced against a man his heart and other immortal parts were not restored to him. For such a man no re-edification and no resurrection was possible. The immortal elements were divine, and by nature pure and imperishable; but they could be preserved

* The conception of a kind of hell is certainly found in the book *Am Dûat* (cf. JÉQUIER, *Le livre de ce qu'il y a dans l'Hadès*, Paris, 1894, p. 127); such allusions are, however, exceptional, and Egyptian belief in a hell appears to have existed at times only, and to have been confined to certain classes of society.

from entering the OSIRIS, from re-entering the hull of the man who had proved himself unworthy of them. The soul, indeed, as such did not die, although personal annihilation was the lot of the evil-doer in whom it had dwelt. But it was the hope of continued individuality which their doctrine held out to the Egyptians; this it was which they

Fig. 17.—The Blessed Dead ploughing and sowing by the waters of the celestial Nile. (From "*The Book of the Dead.*")

promised to the good and in all probability denied to the wicked.

✓ After judgment the righteous entered into blessedness, unchanged in appearance as in nature; the only difference being that, while the existence which they had led upon earth had been limited in its duration, the life of the world to come was eternal. But the future blessedness for which the Egyptian

hoped was far from being a passive state of bliss such as is promised by most of the higher religions,

Fig. 18.—The Blessed Dead reaping and treading out the corn in the fields of Aalû.
(From "The Book of the Dead.")

an absorption into the All or into the Godhead, a dreamy state of floating in everlasting repose, content, and unimpassioned joy. The average Egyptian

expected to lead as active a life in the world

Fig. 19.—One of the Osirian dead sailing in his papyrus bark along the heavenly canals. (From *The Book of the Dead*.)

to come as he had led here. Although with the Godhead, he counted on retaining his independent individuality in all respects and on working and enjoying himself even as he had done on earth. He expected his chief employment to be agriculture, the occupation which must have seemed most natural to a people almost entirely dependent upon the produce of the fields. A vignette belonging to chap. cx. of *The Book of the Dead* represents the dead at work in the

fields of the Blessed,* ploughing with oxen, casting

* The "fields of Aalû"; cf. the "Elysian fields" of the Greeks.

the seed-corn into the furrows (fig. 17), cutting the ripe ears with sickles, driving oxen to tread out the grain from the straw (fig. 18), and finally piling up the corn in heaps against it was required to serve for the making of bread. For change and

Fig. 20.—The Blessed Dead making offerings to the celestial Nile-god.
(From "The Book of the Dead.")

recreation they sailed upon the canals of the next world in their boats (fig. 19), played at draughts with their own souls, or made offerings to the gods, especially to the celestial Nile, which gave water to their fields and fertility to their seed (fig. 20). All went on exactly as here, excepting that the work of the blessed was

invariably crowned with success. The Nile always overflowed the fields to best advantage, the corn grew five ells high and its ears were two ells long, the harvest never failed to be abundant, the weather was always favourable, the fresh and pleasant north wind was always blowing, the foe was always conquered, and the gods graciously accepted all offerings and requited the givers with rich gifts of all kinds. In short, the life of the dead in the kingdom of the gods was an idealised earthly life, although not always a very moral life according to our standards.

But this belief in the life of the next world as the exact counterpart of this implied a danger which involved the Egyptian in heavy cares. The dead lived, therefore they must of necessity eat and drink, for without these processes the continuation of life was inconceivable; if the dead were without food they would be starved. The inscription of the sepulchral pyramid of \hat{U} nas, an Egyptian king of the Fifth Dynasty, gives expression to this fear. "Evil is it for \hat{U} nas," says that text, "to be hungry and have nothing to eat; evil is it for \hat{U} nas to be thirsty and have nothing to drink." The necessities of life were, indeed, partly ensured to the dead by means of the offerings made to them by their sur-

vivors on recurrent feast-days, and partly mysteriously created for their use in the next world by the repetition of magic formulæ in this.* But if the offerings

Fig. 21.—Ancient kingdom KA-statues of servants—potters and bread-makers. (*Originals in the Ghizeh Museum.*)

ceased, or if no one took the trouble to repeat the formulæ, the dead were left to their own resources, and must work, and till the land, and earn their own living.

* See p. 19.

Such enforced labour could hardly have appeared very attractive to Egyptians of the upper classes, and so an expedient suggested by the conditions of their earthly life was devised for evading it on their behalf. The rich man who had servants to work for him in this world was desirous of securing like service for himself in the world to come. In the time of the Ancient Empire it seems to have been taken for granted that those who were servants in this life would be servants also in the life beyond. With this selfish end in view the rich of those times had placed within their own sepulchral chambers KA-statues of their servants in order to ensure immortal life to them also (fig. 21). As the old Germans were followed into the next world by their slaves and horses; as other uncivilised nations sent the servants of the dead to the realm of death after their masters,* so in

* From scenes in the tomb of Mentûherkhepeshf at Thebes, dating from the beginning of the Nineteenth Dynasty, we have evidence that Egyptian funeral ceremonies occasionally included human sacrifice at the gate of the tomb, the object of such sacrifice being doubtless that of sending servants to the dead. But the practice would seem to have been very exceptional, at any rate after Egypt had entered upon her long period of greatness. See MASPERO, *Mémoires de la Mission Archéologique du Caire*, V., p. 452; cf. WIEDEMANN, in *Le Muséon*, XIII., p. 457 *et seq.*; see also GRIFFITH, *The Tomb of Paheri*, pp. 20, 21, in the Eleventh Memoir of the Egypt Exploration Fund.

Ancient Egypt a certain portion of mankind was set apart to serve the rest through all eternity. But as Egyptian civilisation advanced and a more humane state of feeling dawned, these views were modified, and the thought gained ground that all Egyptians were equal in the presence of death and of the gods. So the rich man was obliged to renounce his hope of finding his servants again at his service beyond the tomb, and was face to face with the old fear of being reduced to heavy toil through the possible negligence of his successors.

A most singular expedient was adopted to avert this danger : little images of clay, or wood, or stone, or even of bronze, were made in human likeness, inscribed with a certain formula,* and placed within the tomb, in the hope that they would there attain to life and become the useful servants of the blessed dead ; they are the so-called ŪSHABTIŪ (or Respondents), of which hundreds and thousands of specimens

* Chapter vi. of *The Book of the Dead* consists of this formula, which there reads : "O Ūshabti there ! Should I be called and appointed to do any of the labours that are done in the Nether-world by a person according to his abilities, lo ! all obstacles have been beaten down for thee ; be thou counted for me at every moment, for planting the fields, for watering the soil, for conveying the sands of East and West. Here am I, whithersoever thou callest me !" — *Renouf's Translation*.

may be found in collections of Egyptian antiquities (see Frontispiece*). These "servants for the underworld," or "servants to the OSIRIS," as the texts call them, owed their very being and life to the dead, and stood to him in the same relation as man to God. And as men seek to testify their gratitude to the Creator by doing Him service, so it was hoped that these little figures would show their thankfulness by their diligence, and spare their master and maker all toil.

Many other customs arose out of similar ideas to those which gave rise to the institution of *ÛSHABTIÛ*. Articles of personal adornment and for toilet use, wreaths, weapons, carriages, playthings, and tools were given to the dead, and a whole set of household furniture was often laid away in the grave in order that the OSIRIS should not be obliged to set to work at once to make or collect these things for himself on his entrance into the next world; for this purpose choice was often made of such objects as the man had used and valued in his lifetime. All this care,

* The frontispiece represents one of 399 *ÛSHABTIÛ* made for a priest named Horût'a, who lived during the Twenty-sixth Dynasty. These *USHABTIÛ* were found at Hawara by Petrie: see *Kahun, Gurob, and Hawara*, pp. 9, 19.

however, was bestowed not simply in the interest of those who had entered upon the life everlasting but also in that of those who were left behind. Among other powers possessed by the dead was that of going to and fro upon earth; and, to prevent their exercise of it, all things whose lack might impel them to revisit the scenes of their earthly lives were placed within the tombs, for their visits might not be altogether pleasant for survivors withholding any part of the goods which belonged to the dead. But these facts must not lead us to conclude that the tomb was the permanent dwelling of the dead, and that the objects placed within it were really intended for his use there, and for all time.

As the amulets laid in and about the mummy were for the use of the OSIRIS, so the furniture and implements placed near the coffin were intended not so much for the mummy lying in its tomb as for the OSIRIS dwelling with the gods. Each of these objects had its heavenly counterpart, even as the mummy was represented by the OSIRIS.*

* Professor Petrie, speaking of his discovery that it was the Egyptian custom to place masonic deposits of miniature model tools, etc., underneath the foundations of temples, and giving an account of the foundation deposits which he found beneath the pyramid temple of Ūsertesen II., at Illahûn, says: "The reason

It was thus that the Egyptians sought to make themselves homes in the next world, and to secure all the comforts and pleasures of their earthly life in the life which was to come. Nevertheless, the pious Egyptian did not expect to remain for ever as an OSIRIS, or as a god in human likeness: he rather hoped for ever-increasing freedom, for the power of taking other shapes and transforming himself at will into quadrupeds; or into birds—such as the swallow or the heron; or into plants—more especially the lotus; or even into gods.*

This is no doctrine of compulsory transmigration such as used to be freely ascribed to the Egyptians on the strength of the statements made by Herodotus †; there is no question here of souls being for burying such objects is yet unexplained; but it seems not unlikely that they were intended for the use of the KAS of the builders, like the models placed in tombs for the KAS of the deceased. Whether each building had a KA, which needed ghostly repair by the builders' KAS, is also to be considered" (*Kahun, Gurob, and Hawara*, p. 22). We know that each building had its guardian spirit in the form of a serpent (cf. the representation of one dating from the time of Amenophis III., in Ghizeh, No. 217, published by MARIETTE, *Mon. Div.*, pl. 63 b).

* *The Book of the Dead*, chaps. lxxvi.—lxxxviii.

† "The Egyptians were also the first to broach the opinion that the soul of man is immortal, and that when the body dies it enters into an animal which is born at the same moment, thence

forced to assume fresh forms in which their purification is gradually worked out and their perfection achieved. To the Egyptian transmigration was not the doom of imperfect souls, but a privilege reserved for such as had already attained perfection. Again and again the texts assert that the blessed may assume any form and visit any place at will; body and place can no longer enthral him. He may travel round the heavens with the Sun-god Rā, or arise from the shades with Osiris in the "divine night" of the 26th of the month Khoiak (*i.e.* at the winter solstice); he is even as a god, nay, he is himself a god, able to live in and by Truth, actually taking it, indeed, as food and drink.

The power of the soul to incarnate itself at pleasure became one of the chief reasons for embalming the body. As we have seen, the preservation of the body was held to be necessary because the mummy

passing on (from one animal into another) until it has circled through all creatures of the earth, the water, and the air, after which it enters again into a new-born human frame. The whole period of the transmigration is (they say) three thousand years. There are Greek writers, some of an earlier, some of a later date, who have borrowed this doctrine from the Egyptians, and put it forward as their own."—HERODOTUS, II., 123. See WIEDEMANN, *Herodots Zweites Buch*, p. 457 *et seq.*

was supposed to be the material form of which the OSIRIS was the essential reality. But this temporary need might have been met in simpler fashion, since the journey of the Soul to the Hall of Judgment was accomplished in a comparatively short time. There was, however, a further need for which provision had to be made. The soul might sometimes visit the mummy, again take up its abode in its former body, and, animating it anew, return to earth under that form and thus revisit the spots where once it had dwelt. To this end it required an earthly and tangible body, and this was supplied by the mummy. If the mummy were destroyed, then the soul not only lost one of the forms in which it might incarnate itself, but that one with which its interests were naturally most closely connected—that one which linked it to earth and best enabled it to exhort the survivors to remember the funerary offerings, and to see how it fared with those whom it had been obliged to leave behind. The destruction of the mummy did not involve the destruction of the soul, but it narrowed the soul's circle of activity and limited its means of transmigration.

This doctrine gave rise to the necromantic theory that a soul might be compelled by means of magic

formulæ to re-enter its body, and to speak through the dead lips. The magician who had brought this about could then stipulate for all kinds of favours before restoring the soul to freedom. It is true that such an attempt was reckoned highly dangerous; and, according to a tale dating from Ptolemaic times, a royal prince named Setna,* who had succeeded in the undertaking, paid heavily for having sought to make the spirits of the dead subject to him, when, through his own imprudence, he was overpowered by those whom he had invoked.

The above sketch of the eschatology of the Ancient Egyptians is drawn from their own religious texts. As to the origin of that system and the transformations which it had undergone before reaching the form under which it is known to us we are as yet entirely ignorant; but it is obvious that it must have developed gradually and assimilated many originally heterogeneous doctrines. For instance, the KA and the OSIRIS must surely once have had the same significance, and not have been considered as two

* For the "Story of Setna" see Vol. II. of Professor Petrie's *Egyptian Tales*.

different factors of the dead man's being until time had brought about the fusion of two theological systems—in one of which the KA was regarded, as the spiritual *Doppelgänger*, or Double, while in the other it was named the OSIRIS. All attempts at solving these and similar problems connected with this subject are, as yet, mere hypotheses. As far back as Egyptian history has been traced the people appear to have been in possession not only of written characters, national art and institutions, but also of a complete system of religion. As in all other departments of Egyptian life and thought, so with the Egyptian religion—we cannot trace its beginnings. In the earliest glimpse of it afforded by the Egyptian texts it appears as perfect in all its essential parts; nor were after-times able to effect much change in it by the addition of new features. What greatly intensifies the deep historical interest of Egyptian eschatology is that it testifies not only to the fact that a whole nation believed in the immortality of the soul four thousand years before the birth of Christ, but also that this nation had even then succeeded in clearly picturing the future life to themselves after a fashion which may indeed often seem strange and incomprehensible to modern

minds but to which we cannot deny a certain consistency and a deep spiritual connotation.

We shall not here discuss the many analogies subsisting between Egyptian belief and the religious systems of other nations and times, nor yet its great differences from them; and it is for the sciences of anthropology and comparative religion to determine to what extent the Egyptian doctrine of immortality originated in Egypt itself, and how much was brought there by the Egyptians from the common home which they had shared with the Semites and Indo-europeans.

*The Books mentioned in this Catalogue
can be obtained to order by any Book-
seller, or will be sent post free by
the Publishers on receipt of the pub-
lished price.*

H. GREVEL & CO.'S PUBLICATIONS.

Music.

CORRESPONDENCE OF WAGNER AND LISZT.

Translated into English, and with a Preface by Dr. FRANCIS HUEFFER.
2 Vols. Crown 8vo, cloth, gilt top. £1 1s.

“Nothing more instructive with regard to the real character and relations of Liszt and Wagner has been published. Seldom have the force and fervour of Wagner’s German been rendered with such accuracy and character in a strange tongue.”—*Manchester Guardian*.

WAGNER’S LETTERS TO HIS DRESDEN FRIENDS

(Uhlig, Fischer, Heine, etc.).

Translated by J. S. SHEDLOCK.

With an Etching of WAGNER’S PORTRAIT by C. W. SHERBORN,
and a COMPLETE INDEX.

Crown 8vo, cloth extra, gilt top. 10s. 6d.

“Admirers of Wagner’s genius will find here a fund of information about the *vie intime* of the musician.”—*Graphic*.

“All who are interested in the personal character and career of Richard Wagner—such persons may hold diverse opinions as to his art—will welcome this book as a companion volume to the English version of the Correspondence between Wagner and Liszt.”—*The Musical Times*.

“It is quite impossible within limited space to give a satisfactory description of the contents of this extremely interesting volume.”—*Athenæum*.

“These letters are supremely interesting, for they show Wagner as he really was, no one-sided representation, but the whole man.”—*Daily Telegraph*.

WAGNER AND HIS WORKS:

The Story of His Life, with Critical Comments.

By HENRY T. FINCK.

With Two Portraits. 2 Vols. Crown 8vo, cloth. £1 1s.

“Mr. Finck has undoubtedly enriched the literature of Music with a book of sterling worth.”—*Morning Post*.

“Mr. Finck has an exhaustive acquaintance with all the works on the subject, he has Wagner’s own works at his fingers’ ends, and he has shown remarkable ability in digesting and summarising his plethora of material. More than that, his comments are expressed in a lively and entertaining style.”—*Graphic*.

“Mr. Finck’s work is perhaps the most exhaustive and appreciative account of the great composer that has appeared in the English language.”—*Times*.

LETTERS OF FRANZ LISZT.

Edited and collected by LA MARA.

Translated by CONSTANCE BACHE.

Vol. I. Years of Travel as Virtuoso. With a Portrait.

Vol. II. From Rome to the End. With a Frontispiece.

2 vols. Crown 8vo, cloth, £1 1s.

“Between six and seven hundred letters, every one of which is worth reading, are reproduced in this collection, and are lavishly supplemented by Chronological and Explanatory Notes, which render the book extremely valuable to musicians and men of letters as a work of reference. Its technical production, moreover, is in every respect exemplary.”—*Daily Telegraph*.

“Altogether the letters present a lifelike study of an original, amiable, and singularly interesting character, and they may be said to shed a new light upon the labours, struggles, and triumphs of one who was for many years the petted but never the spoiled darling of society, and who, both as maestro and virtuoso, had the gift beyond any man of his period of exciting the personal affection, as well as the enthusiastic admiration, of all with whom he came in contact.”—*Birmingham Daily Post*.

VERDI:

An Anecdotic History of his Life and Works.

By ARTHUR POUJIN.

With Portrait and Facsimile.

Translated from the French by JAMES E. MATTHEW.

Crown 8vo, cloth extra. 6s.

“It is long since a more readable and fascinating book has come under our notice. Mr. Matthew has acquitted himself excellently of the task of translation, and the well-printed volume will be heartily welcomed by musicians.”—*Athenæum*.

“Mr. Matthew’s well-written translation of Pougín’s work would at any time be pleasant, and just now must have special charms.”—*The Quarterly Musical Review*.

“The publication is very timely. It comes just when most wanted, and enables musical readers to study every stage of the fortunate career which has now reached its climax and consummation.”—*Daily Telegraph*.

“This extremely interesting volume will be much appreciated in the musical world.”—*Pall Mall Gazette*.

CELEBRATED PIANISTS OF THE PAST AND PRESENT.

By A. EHRlich.

A Collection of 116 Biographies and 114 Portraits.

8vo, cloth, 7s. 6d.

“A convenient record of important biographical details. Over one hundred masters and mistresses of the keyboard find places in these pages—the names ranging from John Sebastian Bach to Couperin and Rameau, down to the most famous among contemporary executants.”—*Daily Telegraph*.

MANUAL OF MUSICAL HISTORY.

With 150 Illustrations of Portraits, Musical Instruments, Facsimiles
of Rare and Curious Musical Works.

By JAMES E. MATTHEW.

1 Vol. Crown 8vo, cloth. 10s. 6d.

“This book is well written, interspersed now and again with an anecdote or amusing passage in the lives of the great composers.”—*Morning Post*.

“The sketch of the later music in Germany, Italy, France, and England, brings the book up to date, and concludes a well-written, profusely illustrated, and admirably compiled volume.”—*Musical News*.

“The plan of the book is admirably arranged and printed. The work can be well recommended to all who desire a musical history, giving full information in a concise and accessible form, and which is detailed without being diffuse.”—*Musical Standard*.

“The author covers the entire ground of his subject from the time of St. Gregory to the present day, and serves admirably for those who wish to obtain some general idea as to the progress of the art. The facts are succinctly set forth, the statements are correct, and the many illustrations give the work a distinct value.”—*Daily Telegraph*.

THE CLASSICAL PICTURE GALLERY.

Reproductions of Classical Pictures from the Public
and Private Galleries of Europe.

Published Monthly.

Each Part 1s. 3d. post free, containing Twelve Plates, 4to.
Annual Subscription, 15s. post free.

“All the principal galleries in England and on the Continent have been laid under contribution, and the masterpieces of the great painters are admirably reproduced in process at so cheap a rate that each number of the Classical Picture Gallery is given for one shilling. This collection is by far the best of the cheap editions of copies from the Old Masters.”—*Graphic*.

“It is worth the attention of those who wish to make a collection of illustrations of the works of great painters at a small cost.”—*Builder*.

“Judged by their price, the plates are little short of wonderful. They will be of no little value to the serious student of art, who will be able by their means to compare types and expressions, and refresh his memory in various ways.”—*Saturday Review*.

“The reproductions are marvellously cheap, and they certainly give a far better idea of the pictures represented than any publication we have seen. To those who have an interest in art, to whom pictures in foreign galleries are mere names, the work will be most valuable; nor will it meet a less cordial welcome from those who desire to recall what they have seen.”—*Birmingham Daily Post*.

THE CLASSICAL PICTURE GALLERY.

Volumes I.—VI., for 1890 to 1895, containing each 144 Plates.

With Biographical Notices of the Artists, and a Complete Index.

4to, cloth extra, gilt top. Each Volume £1 1s., net.

THE CLASSICAL SCULPTURE GALLERY.

Reproductions of Classical Sculptures from the
Public and Private Collections of Europe.

*Published in 12 Monthly Parts at 6d. each, or 8s. post free. Each
Part containing 6 Plates.*

Vol. I. Annual Subscription, 8s. post free.

VELAZQUEZ AND HIS TIMES.

By CARL JUSTI, Professor at the University of Bonn.

Translated by Professor A. H. KEANE, and Revised by the Author.

With 52 magnificent Woodcuts, an Etching of Velazquez' Own Portrait by Forberg, and a Plan of the Old Palace at Madrid.

Royal 8vo, Roxburghe. £1 1s.

"No complete or adequate account of the life and works of Diego de Silva Velazquez has been written until the masterly Biography by Professor Carl Justi, which will long be looked upon as *the definitive biography* of the Great Master."—*Edinburgh Review*.

"No better example could be given of the growth of historical knowledge during the past thirty years than is to be found in Carl Justi's recent book on 'Velazquez,' well translated by Professor A. H. Keane. The amount of research and of real observation which his book shows is typical of the modern scholar."—*Times*.

"Considering the estimation in which the works of Velazquez are now held in this country, it was fitting that the monograph which Professor Justi has devoted to his life and times should be presented in an English form to the public. The book has been written with true German thoroughness, and the labour involved in amassing and digesting the enormous amount of information contained in it is beyond conception. Every picture that Velazquez ever painted seems to be enumerated. Every event in his life is carefully recorded."—*Morning Post*.

A MODERN DANCE OF DEATH.

By JOSEPH SATTLER, Designer of "Art in Book-Plates."

Title and 13 Plates in Heliogravure, partly coloured.

In Portfolio. £2 2s. net.

TITLES OF THE 13 DESIGNS:—Worm-Holes—The Call of Death—The Tumbling House—The Conflagration—The Dangerous Bridge—Death and the Drunkard—The Last Act—Equality—The Three Dice (Plague, Cholera, Typhus)—The Last Leap of Death—The Eye of the Pessimist—The Good Friday Angelus—Christ Crowned by Death.

"The Dance of Death is a weirdly fantastic idea which appealed acutely to the curiously mystic and morbid imagination of the ancient German Designers. It was frequently treated by them, and it formed one of Hans Holbein's most famous subjects. The version which Sattler gives us now is full of weird power—full, moreover, of mordant personality. It is utterly unlike anything which, so far as I know, has come from the hand of a modern designer. The grim skeleton, with seals and keys dangling from his bones, crossing a row of mediæval books on sharply pointed stilts which leave on the pages over which they pass a tortuous course of worm-holes, is at once repellent and fascinating. The Design leaves on the mind an acute and powerful, if a grotesquely unpleasant impression."—*The Studio*.

MANUAL OF EMBROIDERY AND LACE :
Their Manufacture and History from the remotest
Antiquity to the present Day.

By ERNEST LEFÉBURE, Lace Manufacturer and Administrator of the
 Musée des Arts Decoratifs, Paris.

Translated and Enlarged, by ALAN S. COLE, of the South Kensington
 Museum.

With 156 Illustrations.

Crown 8vo, cloth extra, gilt top, 10s. 6d.

“A book which is not only a comprehensive, well-arranged, and trustworthy history of a delightful art, but a book which is pleasant to see and pleasant to read, well written and well edited. Its manner of production does much credit to the publishers.”—*Academy*.

Artistic Anatomy.

THE STUDENT'S ATLAS OF ARTISTIC
ANATOMY,

For the Use of Sculptors, Painters, and Amateurs.

With THIRTY-FOUR PLATES.

By CHARLES ROTH, Professor of Sculpture at the Munich Academy.

Edited by C. E. FITZGERALD, M.D.

Fol., in Portfolio. £1 5s.

“Professor Roth's well-known and highly valued plates of the human muscles and bones, with his nomenclature and descriptive notes, are worthily reproduced in this complete portfolio.”—*Athenæum*.

“The plan of the Atlas, which has been considerably enlarged from its original form, is very simple and convenient. The two first plates represent the bony framework of the body, and the eight following ones the muscles in action. The figure plates are carefully drawn and admirably printed, and each is followed by an explanatory plate, in which the parts depicted are numerated, while notes are added directing attention to those points which are of especial interest to artists.”—*Daily Graphic*.

“It is a bold experiment to attempt to combine at once the classical, natural, and anatomical elements in drawing from the nude, but in this the author has succeeded remarkably well. The limitation to a single pose prevents all confusion, and very much facilitates anatomical knowledge, whilst the addition of separate sketches at the end of the atlas furnishes an opportunity for more detailed study of the limbs and head. The plates are admirably executed, the engraving being smooth and even, and at the same time sufficiently vigorous in the contrast of light and shade. Dr. Fitzgerald's translation of Professor Roth's work is altogether a valuable aid to the study of artistic anatomy, and in itself a work of art.”—*Lancet*.

THE HUMAN FIGURE :

Its Beauties and Defects.

By ERNEST BRUCKE, Emeritus Professor of Physiology in the University of Vienna, and formerly Teacher of Anatomy in the Academy of Fine Arts at Berlin.

With 29 Illustrations by HERMANN PAAR.

Edited, with a Preface, by W. ANDERSON, Professor of Anatomy to the Royal Academy of Arts, London.

Crown 8vo, cloth. 7s. 6d.

“An exceedingly valuable work for sculptors, painters, and all such as, possessing some knowledge of anatomy, are engaged in artistic pursuits, and one which may likewise be read with pleasure and profit by the comparatively uninitiated. Written in a clear, concise style, equally removed from pedantry as from superficiality, Herr Brücke combines an artist’s sentiment with the anatomist’s keen eye, and his work is evidently the result of thoughtful study. The artist, he tells us, should be able to detect the faults of the human frame as easily as the horse connoisseur recognises the defects of an animal.”—*Times*.

“The work is primarily addressed to artists, but all those who are interested in the artistic representation of the human body will find it a very interesting and suggestive work.”—*Edinburgh Medical Journal*.

“No book could be more welcome to the English artist and anatomist.”—*Lancet*.

“We can strongly recommend it both to the art-student and to the full-fledged artist.”—*Saturday Review*.

“We cannot single out the numerous points of interest touched upon.”—*Dublin Journal of Medical Science*.

“It is long since we have been called upon to review a more thorough, learned or interesting book upon an attractive and important subject.”—*Athenæum*.

MANUAL OF EGYPTIAN ARCHÆOLOGY :
And Popular Guide to the Egyptian Antiquities
for Students and Travellers.

By Professor G. MASPERO, D.C.L. Oxon.

English Edition, with Notes, by AMELIA B. EDWARDS, Ph.D., LL.D.

With 309 Illustrations.

New and Cheaper Edition, revised by the Author.

CONTENTS.—Chapter I. Civil and Military Architecture. Chapter II. Religious Architecture. Chapter III. Tombs. Chapter IV. Painting and Sculpture. Chapter V. The Industrial Arts.

Crown 8vo, cloth extra, gilt top, 6s.

“It is a marvel of erudition and condensation. It sums up the long results of thousands of years of Egyptian civilisation in language precise enough to make the work a handbook for the specialist, and popular enough to insure its becoming a guide to the antiquarian lore of the country for travellers in Egypt.”—*Scotsman*.

“The Publishers have conferred a boon alike on tourists and students by their issue of a fourth and revised edition of Professor Maspero’s ‘Manual of Egyptian Archæology,’ as translated by the late Miss Amelia B. Edwards. In its essential features, which could not indeed be easily improved, the work remains what it was when first presented to the English public some eight years ago, but the present edition has been carefully corrected, in view of the continued progress of Egyptological knowledge, by M. Maspero himself; additional matter has been inserted, and numerous fresh illustrations are given. It should also be mentioned that by the introduction of separate page-headings and other improvements the worth of the book for purposes of reference has been considerably enhanced.”—*The Guardian*.

“It is enough to mention this new edition of Mr. Maspero’s well-known work, which has been revised and enlarged by the author, and brought down so as to include the latest researches into its subject. The author is acknowledged as one of the most eminent authorities on Egyptian archæology, and into this manual for students he has compressed the result of his vast learning. On the qualifications of Miss Edwards—herself a learned Egyptologist—as a translator, nothing needs to be said. Over three hundred well-executed illustrations are given, and are so chosen as to make the text transparently clear.”—*Birmingham Daily Post*.

THE ANCIENT EGYPTIAN DOCTRINE OF THE IMMORTALITY OF THE SOUL.

By DR. A. WIEDEMANN,

Professor of Oriental Languages at the University of Bonn.

With 21 Illustrations.

Crown 8vo, cloth. 3s.

“Professor Wiedemann’s treatise is quite a perfect thing of its kind. He treats his fascinating subject with marvellous clearness, and the reader follows his guidance through the mazes of the great system of immortality with breathless interest.”—*Saturday Review*.

“This book is extremely interesting and valuable, and is a model of what such a monograph should be.”—*Glasgow Herald*.

“For the first time we have a really sensible explanation of the reason for the preservation of the body in the mummied form, and of the various transfigurations of the soul of the deceased.”—*Manchester Guardian*.

Dr. Wiedemann unravels with much skill this perplexing subject, and explains by these means the elaborate ceremonial which attended the preservation and after care of the dead in Egypt.”—*Spectator*.

“Prof. Wiedemann’s little book appeals not only to the Egyptologist, but also to the student of religion and history, as well as to that larger public which is interested in all that relates to the thoughts and beliefs of civilised men, when set forth in lucid language by a skilful and learned interpreter. Henceforward it will be impossible not to have a clear idea of what the old Egyptians meant when they spoke of *ka* the double, of *ba* the soul, of *ab* the heart, of *sâhu* the idealised body or human form, of *khaib* the shadow, and of the ‘Osiris’ of the dead man himself.”—*Academy*.

THE RELIGION OF THE ANCIENT EGYPTIANS.

By PROF. DR. A. WIEDEMANN.

With 60 Illustrations specially prepared for this work.

Demy 8vo, cloth. 10s. 6d. [In the press.]

MANUAL OF ORIENTAL ANTIQUITIES: Including the Architecture, Sculpture, and Industrial Arts of Chaldæa, Assyria, Persia, Syria, Judæa, Phœnicia, and Carthage.

By ERNEST BABELON, Librarian of the Department of Medals and Antiques in the Bibliothèque Nationale, Paris.

Translated and enlarged by B. T. A. EVETTS, M.A., of the Department of Egyptian and Assyrian Antiquities, British Museum.

With 241 Illustrations.

Crown 8vo, cloth extra, gilt top. 10s. 6d.

“The ‘Manual of Oriental Antiquities,’ which takes deservedly a high position both for the general accuracy of its statements and excellent character of its illustrations.”—*Athenæum*.

“M. Babelon’s work has already won such a high measure of praise from the students of Oriental archæology that its place is assured among modern authorities on the art and culture of the ancient civilised nations of Western Asia.”—*Academy*.

“The quantity of information contained in one small volume is wonderful, embracing the art history of Chaldæa, Assyria, Persia, Syria, Judæa, Phœnicia, and Carthage. By the study of the illustrations alone a clear idea can be gained of the different characteristics of these nations.”—*Spectator*.

MANUAL OF GREEK MYTHOLOGY IN RELATION TO ART.

By MAXIME COLLIGNON, late Member of the Ecole Française, Athens.

Translated and Enlarged by JANE E. HARRISON, Author of “Myths of the Odyssey,” “Introductory Studies in Greek Art,” etc

With 140 Illustrations.

Crown 8vo, cloth extra, gilt top. 10s. 6d.

“This is a good book. It fills a gap in our literature, doing for Greek mythology much the same service which Mrs. Jamieson rendered to Christian hagiology.”—*Academy*.

“The gradual development of the type of each god according to the general principles which govern the formation of types in art is historically considered. Miss Harrison’s translation does not read like a translation, but like an English book, and we know no higher praise than this.”—*Saturday Review*.

MANUAL OF ANCIENT SCULPTURE.

By PIERRE PARIS, formerly Member of the École Française, at Athens.

Edited and Augmented by JANE E. HARRISON,

Author of “Myths of the Odyssey,” “Introductory Studies in Greek Art,” etc.

With 187 Illustrations.

Crown 8vo, cloth extra, gilt top. 10s. 6d.

“M. Paris’ admirable manual, which owes much more than its English dress to its accomplished editor, gives us within the narrow compass a lucid and compendious survey of the sculpture of the ancient world.”—*St. James’ Gazette*.

EXCURSIONS IN GREECE
TO RECENTLY EXPLORED SITES OF
CLASSICAL INTEREST

(Mycenæ, Tiryns, Dodona, Delos, Athens, Olympia,
Eleusis, Epidaurus, Tanagra).

A Popular Account of the Results of Recent Excavations for
Students and Travellers.

By CHARLES DIEHL, Professor at the University of Nancy.

Translated by EMMA R. PERKINS,

Head Mistress of the Thetford Grammar School for Girls.

Illustrated. Crown 8vo, cloth. 7s. 6d.

"It would be difficult to point to a single volume in English which takes so comprehensive a survey or deals with its materials in a manner at once so scientific and so popular as this work of M. Diehl."—*Times*.

"We are carried round Greece by a very entertaining and well-informed guide."—*Academy*.

"A book of considerable value to the English student of classical archæology."—*Saturday Review*.

"Of the volume in general we may say that it is of the very greatest value."—*Pall Mall Gazette*.

THE OLYMPIC GAMES.

B.C. 776—A.D. 1896.

Published with the sanction and under the patronage of the
Central Committee in Athens.

By SP. P. LAMBROS and N. G. POLITES, Professors at the
University of Athens.

Part I.—THE OLYMPIC GAMES IN ANCIENT TIMES, with
101 Illustrations ;

Part II.—THE HISTORY OF THE REVIVAL OF THE GAMES.
Participators, Competitors, Victors. Description of the
Festival at Athens.

With English and German Text, in an elegant cover,
2 Parts. 4to, 10s.

OLYMPOS :

Tales of the Gods of Greece and Rome.

By TALFOURD ELY.

With 47 Woodcuts and 6 full-page Photographic Plates.

Crown 8vo, cloth. 7s. 6d.

“In ‘Olympos’ Professor Talfourd Ely furnishes a book which should be found useful by a large number of readers of the present day. The author has set himself to provide an account, which shall be at once systematic and readable, of the chief Greek and Roman deities; accurate according to the light of modern researches and theories, and popular enough in style for general reading—a kind of Lempière up to date. One feature of the book should be especially useful to young readers. Zeus and Jupiter, Hera and Juno, Poseidon and Neptune, and the rest, have parallel but distinct accounts given to them, so that the difference of origin of Greek and Roman deities is made clear.”—*St. James' Gazette*.

“The book is most pleasantly written, and is the fruit of laborious research among the best available authorities on the subject.”—*Echo*.

“Makes a capital gift-book.”—*Scotsman*.

PICTORIAL ATLAS TO HOMER.

Containing over 211 Woodcuts from Works of Ancient Art, illustrating the Iliad and Odyssey, with Descriptive Text, for the use of Schools and Students.

By Dr. R. ENGELMANN and Professor W. C. ANDERSON,

Firth College, Sheffield.

4to, cloth. 10s. 6d.

“An excellent educational idea. The editors regard the Homeric poems as a secular Greek Bible, the illustrations to which not only make the Iliad and the Odyssey more intelligible to the Greek student, but supply a clue to the sacred mysteries of ancient art and literature.”—*Daily Telegraph*.

“The atlas is thus not only useful as an aid to the study of the poems, but available also for the purposes of a student of ancient art as a thing by itself.”—*Scotsman*.

“It ought certainly to prove of service to teachers who wish to render ‘Homer’ intelligible to their younger pupils.”—*Standard*.

“The compilers have gone through ‘Homer’ book by book, and whenever they found an opportunity they have reproduced a bust, or mural painting, or a group of statuary illustrating and elucidating the text.”—*Graphic*.

“Mr. Anderson has done valuable work in preparing this English edition of Engelmann’s well-known ‘Homeric Atlas.’ The additions are all clear, and have been admirably planned.”—*Classical Review*.

“It is a book which every one who loves his ‘Homer’ should study and keep at his elbow.”—*University Correspondent*.

MANUAL OF ARCHÆOLOGY :

Containing an Introduction to Egyptian and Oriental Art, Greek, Etruscan, and Roman Art.

With 114 Illustrations.

By TALFOURD ELY, Member of the Councils of the Society for the Promotion of Hellenic Studies.

Crown 8vo, cloth, 6s.

“A most admirable gift to those who take an intelligent interest in ancient art would be the ‘Manual of Archæology,’ by Talfourd Ely.”—*Graphic*.

“We know of no such complete and concise handbook to ancient art ; for Mr. Ely, beginning with Egypt, the mother of the sciences, takes us through the art of Chaldea and Assyria to that of Greece and Rome.”—*St. James' Gazette*.

THE MASTER OF TANAGRA :

An Artist's Story of Old Hellas.

By ERNST VON WILDENBRUCH.

Translated from the Seventh German Edition.

Illustrated with 25 Tanagra Figures.

Crown 8vo, cloth extra, gilt top. 5s.

“In this novel the life of old Greece is reconstructed with a realism that gives a correct reflex of the times in a language that is both elegant and picturesque.”—*Morning Post*.

BIARRITZ AND ITS ENVIRONS.

By HENRY O'SHEA.

Author of “A Guide to Spain and Portugal.” With a Map.

16mo, cloth. Price 2s.

THE BOOK :

Its Printers, Illustrators, and Binders, from
Gutenberg to the Present Time.

By HENRI BOUCHOT, of the National Library, Paris.

With a Treatise on the Art of Collecting and Describing Early
Printed Books, and a Latin-English and English-Latin
Topographical Index of the Earliest Printing Presses.

Containing 172 Facsimiles of Early Typography, Book Illustrations,
Printers' Marks, Bindings, numerous Borders, Initials, Head-
and Tail-Pieces, and a Frontispiece.

Royal 8vo, vellum cloth. £1 1s.

“Beginning with the Block Books, which anticipated by a few decades
the discovery of Printing, this work gives an account of the rise and pro-
gress of Printing, the dispersion over Europe of the German printers, the
growth of Book Illustration, of the Binder's Art, and all similar matter
down to the present day.”—*Athenæum*.

MANUAL OF BIBLIOGRAPHY :

or Guide to the Knowledge of the Book, Library
Management, and the Art of Cataloguing.

With a Latin-English and English-Latin Topographical Index of
the Early Printing Centres.

With 37 Illustrations.

By WALTER T. ROGERS, Inner Temple Library. New Edition,
Enlarged.

Crown 8vo, cloth. 5s.

“To this little work the printer, the bookbinder, the artist, the author,
the librarian, the bibliophile, will all turn with interest, and, we venture
to predict, will not be disappointed. It describes ‘The Invention and
Progress of Printing,’ treats elaborately of ‘The Book,’ ‘The Ornamenta-
tion of the Book,’ ‘The Library and the Catalogue,’ and kindred topics.
A useful list of books of reference, a glossary, and an index are added.
The book is nicely got up, and the illustrations add to its beauty and
value.”—*Publishers' Circular*.

“It gives in a pleasant way a great deal of information about the
invention and progress of printing, about rare books, matters of abbrevia-
tion, illuminated capitals, wood engraving, steel engraving, heliotype, etc.,
and a great many other subjects which touch the hearts of book lovers
and book maniacs. It also contains many illustrations of mediæval and
modern printing, binding, and decoration.”—*Echo*.

Books on Ex-Libris (*Limited Editions*).

ART IN BOOK-PLATES,

Forty-two Original Designs for Ex-Libris, Conceived in the Style of the Little Masters of the 16th Century, by Joseph Sattler.

Printed in Colours.

4to. In Portfolio. £2 2s. net.

"We have nothing, it seems to me, so fascinating and so curious as the Book-Plates of Joseph Sattler. He is decorative, weird, quaint, picturesque, humorous, grotesque by turns. There seem to be no limits to his invention, no bounds to his ingenuity."—*Studio*.

"One of the most remarkable volumes upon our subject which has yet appeared."—*Ex-Libris Journal*.

"The book of the year."—*The Book-Plate Armorial Year-Book*.

RARE OLD BOOK-PLATES

of the 15th and 16th Centuries: containing 100 Plates by Albert Dürer, H. Burgmair, H. S. Beham, Virgil Solis, Jost Amman, etc.

Edited by F. WARNECKE.

4to. Roxburghe. £1 8s. net.

"Book-Plates are, as a rule, high-class specimens of the engraver's skill, and a collection of them really forms a study of history—an epitome of the rise and fall of historic families. In Germany much greater care is bestowed on Book-Plates than in this country, although several English artists have turned out work not unworthy of comparison with anything produced on the Continent. Small collections of Book-Plates by Mr. Frederick Warnecke and Professor Hildebrandt, and other artists, have just been published by Messrs. H. Grevel and Co., Covent Garden, and contain some specimens which reach the mark of masterpieces in design and effect."—*Daily Telegraph*.

THE BOOK-PLATES OF ULRICH DUKE OF MECKLENBURGH,

Woodcuts by LUCAS CRANACH and other Artists.

Collected and Reproduced by CHARLES TESKE. Fol., 3s. net.

HERALDIC BOOK-PLATES:

Fifty Ex-Libris.

Invented and Drawn by Professor AD. M. HILDEBRANDT.

4to. 2 vols. 8s. net.

SYMBOLICAL BOOK-PLATES :**Twenty-five Ex-Libris.**

Invented and Designed by CLEMENS KISSEL (Mayence).

4to. 4s. net.

A SCORE OF BOOK-PLATES.

Invented and Designed by G. OTTO.

With a Preface by FREDERICK WARNECKE.

4to. 4s. net.

**THE EX-LIBRIS COLLECTION OF THE
DUCAL LIBRARY AT WOLFENBÜTTEL.****One Hundred and Sixty Selected Book-Plates
from the XVth to the XIXth Century.**

By HOLBEIN, VIRGIL SOLIS, L. KILIAN, CHODOWIECKI, JOSEPH
SATTLER and others.

With a Preface by DR. O. VON HEINEMANN, Chief Librarian of the
Ducal Library at Wolfenbüttel.

£2 2s. net.

“Since the publication of the late Herr Warnecke’s ‘Die Deutschen Bücherzeichen,’ in 1890, no more important book on the subject of German Ex-Libris has appeared than that above. As a collection it is unique ; for here we may find specimens of many of the most rare and beautiful German Book-Plates in existence, some of them as early as the fifteenth century, and the majority of them earlier than the present century. The volume contains no less than one hundred and sixty plates and the selections are made with remarkable discrimination and taste. British collectors will be charmed with the number and infinite variety of the plates, reproduced in this work, and as the number of copies is limited to one hundred, the stock will soon be exhausted.”—*Ex-Libris Journal.*

INITIALS :

An Alphabet from the year 1596, after the Original
Etchings by J. Theodor and J. Israel de Bry.

A Facsimile Reproduction of the Frankfort Edition of 1596.

With 23 Plates. 4to. 4s. net.

THE SWORDSMAN :

A Manual of Fence for the Foil, Sabre, and Bayonet.

With an Appendix consisting of a Code of Rules
for Assaults, Competitions, etc.By ALFRED HUTTON, late Capt. King's Dragoon Guards, Author of
"Cold Steel," "Fixed Bayonets," etc.

With 42 Illustrations.

Crown 8vo, cloth. 3s. 6d.

50 copies printed on Whatman paper, bound in vellum at 10s. 6d.

"Captain Alfred Hutton, a well-known authority on the subject, has compiled a book, which should prove of much service to the beginner, and which also contains many useful hints to the more accomplished performer."
—*Morning Post*.

"Books of the kind are rare in English, and as Captain Hutton is a skilled master, and his method carries authority, the book deserves a welcome from all who are interested in the maintenance of good swordsmanship."
—*Scotsman*.

"We do not know a work that is so full of clear explanation and sound instruction on the art of fencing."
—*Court Journal*.

"Captain Hutton, a well-known authority on all connected with the use of cold steel, has here dealt with another branch of the subject, which he has further explained by many admirably drawn illustrations."
—*Journal of the United Service Institution*.

"This little treatise should be read by all who take any interest or who desire to gain a practical knowledge in the art of fence—an art which has, unfortunately, been much neglected of late years. Captain Hutton deserves the gratitude of all admirers of the *arme blanche*, not only for his able advocacy of the art, but also for his excellent exposition of its practice. The book, which is replete with valuable lessons, contains forty-two illustrations, and will be found a most valuable companion to his other works, 'Cold Steel,' 'Fixed Bayonets,' etc."
—*United Service Gazette*.

OLD SWORD PLAY.

By Capt. ALFRED HUTTON.

Author of "The Swordsman," "Cold Steel," and "Fixed Bayonets," etc.

With 58 Illustrations after Alfieri, Angelo, Di Grassi, Liancourt, Marozzo, De la Touche, Weischner, and other celebrated Fencing Masters, containing a Series of Studies of the Swordsmanship of the 16th, 17th, and 18th Centuries, embracing the Two-hand Sword, Rapier, and Dagger, Broadsword and Buckler, "Case of Rapiers," Early Small Sword Play, etc.

Royal 8vo. Superfine Dutch paper. Vellum cloth, extra. (Limited to 300 copies.)

Buckram. £1 1s.

"Captain Hutton has compiled and arranged the lessons in his book so as to make the antique methods accessible to the student without the labour of searching through many ancient volumes."—*Graphic*.

"Captain Hutton's clear and concise treatment of this curious form of Sword Play, illustrated as it is by plates from Marozzo and Di Grassi, is extremely interesting. This latest contribution to the literature of fencing should not be neglected by any one interested in that fine art."—*Illustrated London News*.

"The plates are superbly reproduced, and form a most valuable collection."—*Saturday Review*.

SKAT:

An Illustrated Grammar of the famous German Game of Cards called Skat.

By ERNST EDUARD LEMCKE.

8vo, cloth, 2s. 6d.

"The game offers so great a variety of combinations that, though there is almost unlimited scope for skill or good play, still there is a sufficient element of chance to maintain the interest to the other hands, however apparently bad the cards they hold, as opposed to the player. The student who has patience to go carefully through Mr. Lemcke's book will be able to master the principles and rules of the game."—*Morning Post*.

IN THE KING'S GERMAN LEGION

During the War with Napoleon.

By Baron Ompteda.

Translated by JOHN HILL, M.A

With Portrait. Demy 8vo, cloth. 10s. 6d.

“When the English Sovereigns were also Kings of Hanover, the army of the little kingdom did good service in our many wars, and more especially in the great struggle with Napoleon, when, after Hanover had been conquered by the French, a German legion was raised to carry on the war on the Continent. Among the officers of this force was Baron Ompteda, who was born in 1765, and began his military service in 1792. Those were the days of the romance of war, and Baron Ompteda had as many adventures as the hero of one of Lever's novels.”—*Graphic*.

“These memoirs throw a light upon the organisation of the English army at a time when it included a foreign legion, and contribute some interesting data to the history of the struggles which culminated in the final overthrow of Napoleon.”—*Morning Post*.

“The statesman may find light thrown on more than one obscure incident of a time which must always be of great historical interest.”—*Daily Chronicle*.

“A very interesting life of a very interesting soldier.”—LORD WOLSELEY

NAPOLEON AT HOME.

The Daily Life of the Emperor at the Tuileries.

By FRÉDÉRIC MASSON.

With 12 beautiful Illustrations by F. DE MYRBACH.

2 vols. 8vo, cloth, gilt top. £1 1s.

“The volumes are enriched by twelve illustrations by F. de Myrbach, representing scenes of the home-life of the great Emperor. Mr. Masson’s work is exactly described by its title. It is a methodical and minute account of the daily home-life of Napoleon, from his rising in the early morning until his late going to bed, after working half through the night. The times and manner of his visits to the successive Empresses, his family parties, his relations with officers of state, and with secretaries and household and personal servants; how he was guarded, the arrangement of his private apartments and their contents; how his expenses were regulated and checked by his own hand—all these matters, and many more relating to Napoleon’s life, are told with systematic order and ample detail.”—*Birmingham Daily Post*.

“‘Napoleon at Home’ is a true feast for all interested in great men.”—*Graphic*.

“If any one wants to know in the fullest detail how Napoleon ate and drank, slept and woke, took his bath, shaved and made his toilet, how he worked and how he spent his rare moments of leisure, he will find it all set down in M. Masson’s laborious pages.”—*Times*.

“. . . Most entertaining. This book will be widely read in an age whose only strong passion is for personal gossip.”—*Daily News*.

BISMARCK'S TABLE TALK.

A Biography by Anecdote. With Notes and an Introduction.

Edited by CHARLES LOWE, M.A.,

Author of "Prince Bismarck, an Historical Biography," etc.

Crown 8vo, with Portrait, cloth, gilt top. 7s. 6d.

"Mr. LOWE has been enabled to make an exceedingly interesting and entertaining volume, and to present the great chancellor as he has chosen to show himself at different periods of his life in the freedom of familiar intercourse and in the confidence of private friendship."—*Times*.

"An amusing and instructive book—one which greatly help English Readers to understand the character of one of the world's greatest men."—*Daily News*.

"The eminently readable character of the book may be best exemplified from its superabundance of amusing anecdotes and sparkling *bon mots*."—*Daily Telegraph*.

"This is a very illuminating and valuable volume calculated to enhance very greatly the respect in which the Prince's remarkable personality is held."—*Globe*.

"A magnificent portrait of the Iron Chancellor by himself."—*Black and White*.

"An attractive book."—*Morning Post*.

"Our knowledge of Prince Bismarck, ample as it might appear to be, would be altogether incomplete without this volume of 'Table Talk.'"—*The Australasian*.

"The book is full of interesting matter, both in personal talk and in political affairs. It comprises vivid pictures of Prince Bismarck at home, and illustrates very piquantly his hearty loves and hates, and his robust prejudices, in which no great man is ever found wanting."—*Daily Chronicle*.

MY WATER CURE

Tested for more than 35 Years for the Cure of
Diseases and the Preservation of Health.

By the Rev. SEBASTIAN KNEIPP,
Parish Priest of Wærishoven, Bavaria.

With 100 Illustrations and a Portrait of the Author.

Complete Copyright Edition. Enlarged by 136 pages; translated
from the last (the 36th) German Edition.

Entirely revised by the Author, with 50 additional Illustrations
of Medicinal Plants.

8vo, cloth, 396 pp. 6s.

This Edition is an accurate rendering of the Original Work, as revised by the Author himself, and is not to be confounded with another Translation, of 272 pages, price 5s., which is made from an old German Edition, and contains neither the Original Woodcuts nor the New Illustrations of Medicinal Plants.

“All Germany bears witness to the worth of his regimen.”—*The Guardian*.

“Here is an author whose book has already gone through thirty-six editions in German alone. There is no form of water cure but the Bavarian pastor has something to say about. This book deals, first, with the numerous forms of water application—shawls, bandages, wet shirts, etc.; next with medicines, and, thirdly, with diseases. We hope it may find a wide circulation in England.”—*Echo*.

“The author expresses himself with directness and simplicity which are truly refreshing. Common sense is the prevailing element running through the book, and by common sense and observation many diseases may be averted. This volume should take its place as an honoured member of the domestic pharmacopœia of the day.”—*Sala's Journal*.

“The translation of this valuable work into English will have the effect of giving us a handbook to health the like of which we cannot boast. The idea of the culture of health is in a sense original, since the methods instituted by the author have in their entirety never been adopted in England. Hydropathy, it is true, has long been popular here, but not altogether on the lines of Sebastian Kneipp. His system he has given in the work under notice, a work that is at once original in conception and able in execution.”—*Christian Union*.

“THUS SHALT THOU LIVE!”

Hints and Advice for the Healthy and the Sick on a
plain, rational Mode of Living and a natural
Method of Curing.

By SEBASTIAN KNEIPP, Curate of Wœrishoven (Bavaria).

Translated from the 19th German Edition.

8vo, cloth. 6s.

FIRST PART: Conditions of Health and Means of Preserving It.

SECOND PART: How the Cures are Effected after Kneipp's Method.

THIRD PART: A Word in Conclusion.

“Father Kneipp, the parish priest of Wœrishoven in Bavaria, enjoys a wide reputation in Germany as the exponent of a system of ‘Water Cure’ which he carries out in his parish and applies to all who consult him there. His fame is not unknown in this country, and many Englishmen have either visited Wœrishoven for the purpose of consulting him or have applied his principles, as set forth in ‘My Water Cure,’ at home. Though not a professed physician, he certainly displays no little mastery of the practical art of healing in some of its simpler applications, and his system, though purely empirical, is not without the sanction of successful experience in a large variety of cases. ‘Thus Shalt Thou Live’ is a literal translation from the 19th German edition of his vade-mecum of dietary and clothing, based on his own observation and experience, containing ‘Hints and Advice to the Healthy and the Sick on a Simple and Rational Mode of Life and a Natural Method of Cure.’ Whilst ‘My Water Cure,’ he says, was destined to show its readers how they might recover lost health by proper applications of water and common herbs, the present work is intended to give them the needful instructions about diet, dwellings, sleep, clothing, etc.”—*Times*.

“‘Thus Shalt Thou Live’ contains an immense amount of good advice on a host of other subjects besides Water Cure. Father Kneipp writes about absurd fashions in dress, properties of food, the ‘hardening’ of children, eating and drinking, and hygienic subjects generally.”—*Echo*.

MY LEGACY TO THE HEALTHY AND THE SICK,

Containing Father Kneipp's final directions for the application of his Water Cure at Home.

With 29 Photographs taken from life, and other Illustrations.
8vo, cloth. 6s.

“In ‘My Legacy’ are given full particulars of how to administer baths of different kinds, instructions as to bandages and compresses, a list of diseases and their cures, and finally, details as to the preparation of his herbal teas, powders, and tinctures, etc. There is a simplicity about this system which is undoubtedly attractive.”—*The Westminster Gazette*.

“What is the secret of good Father Kneipp's cures? In this volume he lays his whole system open. Father Kneipp's book is certain to interest all who have paid attention to natural healing. He gives a large number of simple prescriptions for different diseases, and the volume is illustrated by numerous plates and a portrait of the Pastor himself.”—*The Echo*.

“Patience in experimenting and acuteness of observation have enabled Father Kneipp to draw up a therapeutic system as simple in principle as effective in practice.”—*Daily Chronicle*.

“It is written in language a child could understand, and the processes of bandaging, douching, and other applications of water which it recommends are further explained in a series of photographic illustrations that adds considerably to the value of the book.”—*The Scotsman*.

PLANT-ATLAS,

Describing, and Picturing True to Nature all
Medicinal Plants mentioned in Father
Kneipp's Books.

With 41 Coloured Plates, containing 69 specimens.

8vo, cloth extra, 12s. 6d.; also with uncoloured Plates, 7s. 6d.

Everybody is enabled, by simply consulting the “Plant-Atlas,” to find out for himself whatever herb he will have to look for in woods or fields, and thus to make up, in a most pleasant way, that “Family Medicine-Chest” recommended by Kneipp.

The description is supplied by a distinguished Botanist, and dwells on any point of importance—for instance, upon the General and Special Characteristics of every Plant, its flowering time, use, occurrence, diagnostics, mode of acting, healing power, etc.

THE CARE OF CHILDREN IN SICKNESS AND HEALTH.

Counsels on the Hygiene of Childhood.

By Father KNEIPP. 8vo, cloth. 5s.

THE KNEIPP BROCHURE :

Giving information about the Life and Works of
Father Kneipp, and his Healing Method.

Illustrated. Free on application.

CORPULENCE AND ITS TREATMENT, ON PHYSIOLOGICAL PRINCIPLES.

By Dr. W. EBSTEIN, Professor of Medicine and Director of the Clinical
Hospital at Göttingen.

8vo, boards. 2s. 6d.

“This work is written in a thoroughly scientific spirit, and has no
sign of charlatanry about it.”—*Medical Times*.

CHEMISTRY IN DAILY LIFE.

Twelve Popular Lectures by Dr. LASSAR-COHN, Professor of
Chemistry in the University, Königsberg.

Translated into English by M. M. PATTISON MUIR, M.A., Fellow of
Gonville and Caius College, Cambridge.

With 21 Illustrations. Crown 8vo, cloth. 6s.

These lectures, and the publication of them in book form, caused quite a
stir in German circles, and will no doubt prove equally interesting, instructive,
and suggestive to English readers.

The method of treatment is eminently human and suggestive. The author
shows that chemical phenomena are intimately bound up with our daily lives,
and that whether we are conscious of it or not we are constantly carrying on
chemical operations. He also brings home to us how chemical considerations
play their part in those speculations regarding the physical universe
that are suggested by each fresh discovery made by science.

The book can be followed intelligently by any reader.—*From the Preface*.

“We have nothing but praise for the admirable series of lectures delivered
by Prof. Lassar-Cohn. His scheme is too long to quote in detail, but it
begins with the composition of air and the chemistry of breathing, and
goes on to illumination, foods, agriculture, explosives, tanning, paper-
making, soaps, glass, photography, metals and alloys. Nobody could fail
to be interested by the homely method of setting forth difficult facts, and
those in search of instruction will find it on every page.”—*Pall Mall Gazette*.

THE ELEMENTS OF ELECTRO-CHEMISTRY TREATED EXPERIMENTALLY.

By Dr. RÖBERT LÜPKE,

Headmaster of the Municipal Dorothea *Realgymnasium*, and Lecturer in
the Imperial School of Posts and Telegraphs, Berlin.

With 54 figures in the text. Demy 8vo. About 6s.

[*In the Press.*]

Translated from the Second Edition, Revised and Enlarged, by

M. M. PATTISON MUIR, M.A.,

Fellow and Lecturer of Gonville and Caius College, Cambridge.

Electro-Chemistry is of much importance alike to the student of physics and the student of chemistry. The object of this work is to present, in condensed form, the results of the chief work, most of which has been done in the last twenty years, and much in the last ten years, in this department.

The book deals, firstly with the recent theories of electrolysis, secondly with Van't Hoff's theory of solutions, and thirdly with the osmotic theory of the current from voltaic cells. The leading generalisations in each of these divisions of Electro-Chemistry are deduced from experiments of a simple character, which are fully described. This method of founding the scientific conclusion on the results of experiments which can be repeated in the lecture room and the laboratory with fairly simple apparatus, is the characteristic feature of the book. Attention is directed from time to time to the applications of Electro-Chemistry in arts and industries.

German Language.

MURET'S ENCYCLOPÆDIC ENGLISH-GERMAN AND GERMAN- ENGLISH DICTIONARY.

By Professor Dr. ED. MURET.

Unabridged Edition.

This work will be published in about 36 parts, 4to, at 1s. 6d. each.

Now ready. English-German Dictionary, Parts 1 to 20.

Each Part, 1s. 6d.

MURET'S DICTIONARY is the Latest, the Largest, and by far the most Comprehensive of all English-German Dictionaries. It is the only one with the New German Orthography, and with the Pronunciation after the Phonetic System of Toussaint-Langenscheidt. It contains the Technical Terms in Art, Science, Commerce, and Manufactures; Anglo-Indian words, Provincialisms, and Americanisms; and is distinguished by its clear and concise arrangement, as well as by appropriate Examples. The German-English Part, by PROF. DR. D. SANDERS, will appear very shortly.

DICTIONARY OF THE ENGLISH AND GERMAN LANGUAGES.

By Dr. FR. KOEHLER.

30th Edition, brought up to date, by Professor Dr. H. LAMBECK.

8vo, cloth, 7s. 6d.

“When a dictionary attains its thirtieth edition it may be laid down with a certain amount of confidence that the work is a success, and that those who require dictionaries (and who does not?) have found it to be a good book of reference. This book is useful to the German learning English as well as to the Englishman learning German. It is not, as so many dictionaries are, a one-sided production intended for use by the students of one nationality only. The present edition contains several new features and many additions.”—*Publishers' Circular*.

PRACTICAL GRAMMAR OF THE GERMAN LANGUAGE.

With Reading Lessons, and a German-English and
English-German Vocabulary.

By WILLIAM EYSENBÄCH.

New Edition. 8vo, cloth. 3s. 6d.

“It is decidedly ‘*practical*.’ We like the gradual mode of presenting difficulty after difficulty, and the conversational tone of the exercises.”—*Schoolmaster*.

Lothar Meggendorfer's Toy-Book Series.

ALL ALIVE.

A Movable Toy-book.

By LOTHAR MEGGENDORFER.

Small folio boards, with coloured design. 7s. 6d.

CONTENTS.—A Flock of Sheep—In the Cow Shed—The Watch Dog—The Cart Horse—At the Pond—The Owl—The Stag—Good Friends.

THE MONKEY THEATRE.

By **LOTHAR MEGGENDORFER.**

Folio oblong boards, with coloured design. 7s. 6d.

CONTENTS.—Ourselves—The Repast—He and She—The Performing Goat—The Minuet—Bimbamboo—Madame Pompadour—The Sentinel—See-Saw.

ALWAYS JOLLY.

A Movable Toy-book.

By **LOTHAR MEGGENDORFER.**

Small folio boards, with coloured design. 7s. 6d.

CONTENTS.—The Angler—The Elephant—The Naturalist—The Portrait Painter—The Forgotten Latch-key—The Musician—The Lion—The Pianist.

LOOK AT ME.

A Movable Toy-book.

By **LOTHAR MEGGENDORFER.**

Folio oblong boards, with coloured design. 7s. 6d.

CONTENTS.—Introduction—The Nursery—St. Nicholas—At the Barber's—Sambo and Topsy—The Three Musicians—The Carpenters—The Obstinate Donkey—Fido.

TRANSFORMATION SCENES.

A Movable Toy-book.

By **LOTHAR MEGGENDORFER.**

4to boards, with coloured design. 5s.

CONTENTS.—The Masher comes a Smasher—Musical Darkies—The Astonished Artist—The Obstinate Donkey—The Fair Angler—Silly Billy at the Circus.

SCENES OF ANIMAL LIFE.

A Movable Toy-book.

By LOTHAR MEGGENDORFER.

4to boards, with coloured design. 5s.

CONTENTS.—The Stork at the Pond—The Hare—The Clever Poodle—The Chicken and the Fly—Little Hans and Pussy—The Bear in Trouble.

“Excellent Movable Toybooks, that will please the little ones (when their seniors are tired of playing with them) far into the Yule-tide season. The author is Lothar Meggendorfer, a gentleman to whom *Mr. Punch* wishes a ‘Merry Christmas and a Happy New Year.’”—*Punch*.

“Most novel of the novelties, perhaps, that we have yet seen are the Movable Toybooks by Lothar Meggendorfer. They consist of a collection of funny plates illustrative of comic verses, the figures—animal and human—being made to move by a slip of attached cardboard. The Toybooks are printed in bold letters, suited for little readers, who will find no end of amusement in their laughable scenes and moving figures.”—*Daily Telegraph*.

“I saw the other day a good large Toybook, with movable pictures and figures of animals, which immensely delighted the babies of the school in which it was used. The figures are good, and the movements are as natural as can be expected. The book is called ‘All Alive.’”—*The Schoolmistress*.

THE SPEAKING PICTURE-BOOK,

Reproducing the Voices of the Cock, the Donkey,
the Lamb, the Birds, the Cow, the Cuckoo,
the Goat, and the Baby.

Eight Coloured Pictures, with Rhymes for Children.

One Stout Volume, quarto, cloth, gilt edges, price 15s.

“One has often heard of people who ‘talk like a book’; but here is a book that, if it does not exactly talk, emits audible and vocal sounds. It is adorned with coloured pictures of various domestic animals, including babies. There are also verses describing the peculiarities of the cock, the cow, the goat, and so on, in the artless style familiar to well-regulated nurseries. Here is nothing unusual, though the pictures are well executed and the print clear; but the great novelty of the ‘Speaking Book’ lies elsewhere. You pull a string, and lo! the donkey does indeed bray, the cow ‘moos,’ the small birds twitter, the lamb says ‘baa’ in a lifelike manner, and the baby cries ‘Papa’ and ‘Mama.’ The imitations are wonderfully realistic, and the whole idea of the book is as excellent as the execution is ingenious. No nursery should be without it; and anybody at a loss for a present for good little girls and boys may be safely recommended to order this remarkably clever toy.”—*St. James’ Gazette*.

THE
EGYPTIAN STRUWWELPETER;

OR

The Struwwelpeter Papyrus.

With Full Text and 100 Original Vignettes.

From the Vienna Papyri.

Respectfully Dedicated to Children of All Ages.

4to boards. 3s. 6d.

“A delightful children’s book, in which the various discoveries in Egyptian antiquity are most amusingly parodied in the well-known style of the original Struwwelpeter, for the benefit of the rising generation. Both the letterpress and the illustrations are wonderfully humorous, witty and diverting, and the skill with which the characteristics of Egyptian mythology are made to take their place in the divertissement of the whole is quite extraordinary. The book is altogether delightful, and is sure to approve itself to a discerning public.”—*The Bookseller*.
